Chappa, Bihar 841301

Passport No. - P0560796

Skills

- **Cloud Built & Support**
- **Creating and deleting servers**
- **Adding and removing disks**
- **Taking snap shots**
- **Cloning on public clouds**
- **Troubleshooting for Windows/Linux servers**
- **SSH/RDP access troubleshooting**
- **Configuring AMIs**
- **Support for AWS products**
- **EC2**
- **VPC**
- **IGW**
- **SUBNET**
- **Route Table**
- **NAT Gateway**
- **IAM**
- **S3**
- **ELB**
- **RDS**
- **SQS**
- **SNS**
- **Cloud Watch**
- **Cloud Trail**
- **Cloud-front**
- **Cloudformation**
- **Lambda**
- **Route-53**
- **SNS/SQS**
- **IaaS**
- **PaaS**
- **SaaS**
- **AWS Glue**
- **Git/Git Hub**
- **Codepipeline**
- **CodeCommit**
- **Jenkins**
- **Configure management**
- **Ansible**
- **Attaching Volumes**
- **Backing up by taking snapshots**

RANJAN KUMAR SINGH

Profile

- More than 6 years of total Experience and apart of these 1.8 years' Experience in Cloud engineer experience in multi-vendor environment of large network.
- Utilizes strong managerial skills by negotiating with vendors and coordinating tasks with other IT team members.
- Implements best practices to create cloud functions, applications and **databases**.
- Creating and utilizing tools to **monitor** our applications and services in the cloud including **system health indicators**, trend identification, and anomaly detection.
- Automated system build and the application deployments process.
- Working with **dev.** team to make application **scalable, reliable, and resilient**.
- Be part of the client's scrum team and work on user stories.
- Deep Understanding of **Infrastructure as a Code, PAAS, SAAS and agile methodologies**.
- Experience in **Linux Administration** such as User, Process, Package, Service, and Network, disk Management, Troubleshooting Log Files.
- Experience in designing the **3 Tier Architecture** for applications.
- Creating AMIs, Snapshots, and Volumes in **AWS**, Managed and supported AWS Security related issues such as **IAM & S3** policies for user access.
- Sufficient knowledge in **AWS (Amazon Web Services)** services like Amazon **EC2, AMI, S3, ELB, RDS, VPC**, Amazon Cloud watch.
- Coordinate with the Development/Test Teams to receive the correct versions of re-usable and dependent components for issuing/installing successful builds and making it ready for the Release on time
- Good knowledge on container-based **deployments of Micro-Services/OpenShift/OpenStack**
- Building and deploying **Java applications** and troubleshooting the build and deploy failures and Managing **EBS Volumes** by taking snapshots. Attaching & Detaching EBS volumes to EC2.
- Experience in AWS, creating, importing, and launching volumes, **EC2, RDS, security groups, auto - scaling, load balancers, NACL** in the defined VPC to design cost effective, highly available systems.

Organization Experience

Marquistech Technology Mumbai

June 2022 – Aug

2024

Project: Street Light Project.

- Monitoring Cloud Watch
- Setting up Routing table
- Security Groups
- Providing support to client

Education And Training

03/2014

Bachelor of Engineering:

Computer Science

Rajiv Gandhi Proudlyogiki

Vishwavidalaya

BHOPAL

Languages

Hindi: First Language

English: C2

Proficient (C2)

Bhojpuri: C2

Proficient (C2)

Client: JIO

Role: Test Engineer.

Responsibilities:

- Configured, monitored, and maintained **cloud infrastructure such as virtual machines**, networks, and storage.
- Reduced server **downtime by 30%** by maintaining highly available systems on AWS Cloud Infrastructure.
- Boosted app **delivery speed by 40%** by implementing AWS-based micro services.
- Managed VM Import/Export, resulting in faster and more flexible disaster recovery strategies.
- Enhanced system reliability by 28% by architecting and implementing **AWS cloud security measures, including IAM roles and policies.**
- Spearheaded the migration of enterprise-wide production systems into AWS, resulting in a decreased operational cost by 40%.
- Operating cloud-based infrastructure services, we doubled the service acquisition in 2 years.
- Created users, repositories, branching, tagging, patch fixes, pull request, and trained users on the Git version control system, and new EBS volumes, modifying volume sizes, taking **volume snapshots for backup.**
- Creating launch configuration and **Auto scaling groups.** Adding new launch configuration to Auto scaling group when **AMI updated.**
- Creating Route53 hosted zones to map with public domains, created record sets to map with **EC2 instances/ELB**, using routing policies if necessary.
- Domain registers to **Route53, and S3 buckets** and managing policies for S3 buckets and Utilized S3 bucket storage and backup on AWS.

Metrotel PVT LTD - RF Engineer

Gujarat-India

10/2018 - 05/2019

Project: Telecommunication Reliability

Client: Airtel

Role: RF Engineer.

Roles & Responsibilities:

- Resolved complex problems related to connectivity issues between multiple devices over **multiple frequencies.**
- Designed, built, tested and **deployed antenna arrays for various applications** Including cellular networks.
- Identified potential areas for improvement within existing networks through regular **monitoring activities.**
- Monitored signals using spectrum analyzers and identified sources of interference or degradation in transmission quality or reception level.
- Deployed new sites by coordinating construction efforts with contractors to

Ensure timely completion.

- Optimized power output levels of radio transmitters in order to maximize signal strength while **minimizing interference** with other systems in the area.
- Configured devices such as **radios, amplifiers and antennas according to design specifications.**
- Participated in weekly meetings with project team members discussing progress towards goals and objectives set forth by upper management.
- Collaborated closely with other departments such as **marketing and sales teams** When developing strategies for expanding service coverage areas.

**Nutek India PVT LTD - RF Engineer
Lucknow**

11/2016 - 09/2018

Project: Telecommunication Reliability

Client: Samsung Electronics

Role: RF Engineer.

Roles & Responsibilities:

- Configuration & Troubleshooting for Ericsson, Samsung, Lyf Handheld devices.
- Handling the escalated calls.
- Checking of Daily Call Log records of engineers. (**IT ACCESS tools**).
- Managing Projector & Video conferencing.
- Created weekly report on enquiry by Users.
- Worked within **TCP/IP networked environment**, troubleshoot any issues with Ethernet, working with network switches.
- To troubleshoot the problems that arise by the Client and to support its users.
- Manage **firewall** clients with regular status reports of their **trouble tickets**.
- To ensure integrity of availability of Network Infrastructure to provide maximum performance for users.
- To Ensure Installation & Proper Efficient Working of **Operating Systems Like Windows OS & Linux.**

**Integrated Wireless Solution (IWS)
Coimbatore**

06/2015 - 09/2016

Project: Telecommunication Reliability

Client: ZTE/NOKIA

Role: RF Engineer.

**Phimetrics PVT LTD
KOLKATA**

08/2014 - 06/2015

Project: Telecommunication Reliability

Client: ZTE/Airtel

Role: RF Engineer.
