Summary

With over 3.5 years of experience in Software Development and Product Development, I am a dedicated IT professional currently serving as a Service Engineer in the Finance domain. My expertise spans various methodologies including SDLC, Agile, Waterfall, and hybrid models, ensuring adaptable and efficient project delivery. Proficient in source code management with GIT, I excel in requirement analysis and code development, consistently meeting client expectations with timely solutions.

In terms of technical skills, I bring proficiency in SQL, PLSQL, Core JAVA and Oracle and MSSQL Database, along with expertise in analytical tools like Power BI and documentation tools such as MS Office. Additionally, I am well-versed in web services like SOAP, version control systems like GIT/GIT Bash, and API testing using Postman.
