Technical Skills

- SQL, MYSQL, SSMS
- Python
- Azure BLOB, GEN2
- Azure SQL Databases
- Delta Lake, Data Mart
- Azure Data Factory
- Azure Active Directory
- AWS S3
- Glue, Athena, Lambda
- Snowflake, SnowSQL
- ETL/ELT Development
- Data Modelling

Summary

Experienced Data Engineer with a strong background in designing, developing, and maintaining scalable data solutions. Proficient in Snowflake Data Warehouse, ETL processes, and cloud platforms like AWS and Azure. Adept at optimizing data pipelines, ensuring data quality, and implementing end-to-end data migrations. Proven ability to work independently, contribute in team discussions, and provide expert solutions to complex data related challenges.

Work Experience

Anblicks Solutions

FEB 2022 – JAN 2024

Customer AI | ADLS Gen2, ADF, Snowflake, Snowpark, Power BI

January 2024

- Analyzed, designed, and built modern data solutions using Azure Data Services, supporting advanced data visualizations and analytics, increasing data processing efficiency by 35%.
- Developed an ETL solution in Azure that streamlined data ingestion from multiple sources, increasing data availability for downstream analytics by 40%.
- Developed and analyzed complex SQL queries and stored procedures for extracting business insights, improving decision-making efficiency by 30%.
- Refactored and optimized existing stored procedures, improving data extraction speed by 25%.
- Maintained repositories and branches in DevOps using GIT and Visual Studio, ensuring efficient version control and collaboration, reducing errors by 15%.

HEDIS | Azure SQL Database, ADF, Snowflake, Snowpark, Streamlit

May 2022

- Designed and implemented Azure Data Factory pipelines to automate data movement, improving data transformation efficiency by 30%.
- Developed and implemented Snowpipe for extracting, transforming, and loading data from Azure into Snowflake, increasing data processing speed by 25%.
- Led the data migration efforts, ensuring seamless transfer of data from legacy systems to a new database structure, improving system reliability by 40 and reducing downtime by 20%.
- Utilized the layout editor to create a UI, enabling different scenes to interact with each other, which improved user interaction efficiency by 15%.

Data Migration | AWS (S3, Glue, Athena), Snowflake

February 2022

- Managed and optimized AWS S3 buckets to securely store and manage large volumes of structured and unstructured data, improving data storage efficiency by 35% and reducing costs by 20%.
- Created and scheduled Athena queries using AWS Glue Data Catalog and AWS Lambda for automated data processing and reporting, increasing reporting speed by 30% and reducing manual effort by 25%.
- Designed and implemented ETL workflows using AWS Glue to automate data ingestion, transformation, and loading processes, improving data processing efficiency by 40% and enhancing data availability by 35%.

Certifications

- **SnowPro Core COF - C02**
- **Azure Fundamentals (AZ - 900)**
- **Azure Data Fundamentals (DP - 900)**

Education

VR Siddhartha Engineering College
Master of Computer Applications

Sep 2019 – Feb 2022
Vijayawada, AP
