🌐 raveenachandrasekar

Summary

- Skilled in designing, developing and delivering RPA solutions using UiPath.
- Expertise in building and deploying robots predominantly using REFramework.
- Experienced in monitoring and managing bot runs, to ensure error-free execution.
- Proficient in identifying and resolving exceptions, optimizing performance using UiPath Orchestrator.
- Followed agile methodologies in the team to enhance the work model.

Skills

- Uipath(2021.10.5 & 2022.4.3)
- SQL
- .Net
- VB
- Report Management Tool _Jira
- Amazon Web Services(AWS)

Work Experience

Associate

09/2022 – present | Chennai

Cognizant Technology Solutions

Insurance:

- Gained hands-on experience working with a diverse set of applications including Excel, Salesforce, Mainframe, web and desktop applications, APIs, Salesforce APIs, SharePoint, SAP, Power Apps and AWS.
- Delivered 8 high quality automation solutions, featuring two projects that significantly enhanced process efficiency across multiple departments.
- Collaborated with Power platform team to gather knowledge about the application and identify the most efficient solutions out of it.
- Developed reusable components and libraries to streamline development and improve consistency across automation solutions.
- Monitored and managed automation processes, ensuring stability, timely updates and effective handling of queues.
- Proactively monitored exceptions and engaged with the business team to address root causes and reduce recurring issues enhancing process throughput.
- Utilized GIT repository for version control, enabling effective code management and collaboration with team members.
- Employed Jira to log daily tasks and change requests(CRs) as well as or planning sprints based on backlog priorities.
- Incorporated Confluence pages to create and maintain runbooks that outline bot operations ensuring team members have the insights to manage and support various automation solutions effectively.
- Explored object repositories to enhance my knowledge and I am looking forward to apply this expertise in future implementations.
- Provided guidance and support to junior folks in the designing and development of processes.
- Have experience in migrating automation solutions from Chrome browser to Edge browser ensuring compatibility and performance across platforms.
- Experienced in utilizing both the classic and modern design functionalities within the UiPath platform.
- Hands-on on AI centre incorporating documentation understanding and communication mining.

Healthcare:

- Worked predominantly on excel and desktop automations.
- Collaborated with cross-functional teams, gathered requirements and developed automation solution to increase and improve the scalability.
- Proposed solution design documents(SDD) for the processes I have worked on.
- Engaged in the development of two major end-to-end automation solutions for claim processing.
- Provided support to team members in developing, testing of other processes as well.
- Hands-on experience in UiPath orchestrator to deploy, monitor and trigger jobs.

Awards

Always striving, never settling Constant contribution of efficient automation solutions in the team	09/2024
Doing the right thing, the right way Extended my support to the team in the best possible way	02/2023
