PROFILE

Highly motivated Junior Cloud Engineer with hands-on experience in deploying and managing cloud infrastructure on Microsoft Azure AWS and GCP. Proficient in cloud automation using Terraform, with a focus on virtual machines, networking, and cloud security. Eager to apply my skills in cloud optimization, and automation to drive efficiency. Passionate about learning new technologies and committed to advancing into a Cloud Architect role by continuously enhancing my expertise in cloud solution

PROFESSIONAL EXPERIENCE

06/2022 – present
Delhi, India

Cloud Engineer, Tata Consulant Service

Designed and implemented high availability solutions using Auto Scaling, Elastic Load Balancing (ELB), and Amazon EC2.

Migrated on-premise infrastructure to AWS, reducing operational costs by leveraging services like Amazon RDS, S3, EFS, and EC2.

Monitored and troubleshooted performance bottlenecks using CloudWatch, and Elastic Beanstalk, Managed identity and access control using AWS IAM, enforcing role-based access and implementing MFA for security.

Secured AWS environments by configuring VPCs, security groups, and NACLs, and implementing AWS WAF for enhanced security.

Automated routine cloud infrastructure tasks with Lambda functions and CloudWatch Events, cutting down operational overhead

Configured AWS CloudTrail and Config for monitoring compliance and ensuring security best practices across multiple AWS accounts.

Managed database solutions using Amazon RDS (MySQL, PostgreSQL) and DynamoDB, ensuring data consistency and availability.

Assisted in setting up and managing cloud infrastructure on Google Cloud Platform (GCP), including provisioning and configuring Compute Engine instances and Cloud Storage for various applications.

Collaborated with senior member to implement and manage VPC networks, subnets, and firewall rules to maintain a secure and well-architected cloud environment. Participated in Configuring Google Cloud SQL

Assisted in setting up and configuring Azure cloud infrastructure, including virtual machines, storage accounts, and virtual networks.

Participated in cost optimization efforts by leveraging Azure Cost Management tools, reducing cloud spend

SKILLS

AWS Services: EC2, S3, RDS, Lambda, ECS, VPC, Route 53, CloudWatch, CloudFront, SQS, SNS, IAM

Security & Compliance: IAM, VPC Security Groups, AWS WAF

Monitoring & Logging: CloudWatch, CloudTrail

Operating Systems: Linux (Amazon Linux, Ubuntu), Windows

Web Server: Apache 2, Nginx

DevOps Tools: Jenkins, Docker

Cloud Migrations: AWS Server Migration Service (SMS), AWS Data Sync, Database migration with DMS

Database Management: RDS (MySQL, PostgreSQL, Aurora), DynamoDB

GCP Services: Compute Engine, Cloud Functions, Cloud Storage, BigQuery, Cloud SQL, VPC, Pub/Sub, Cloud IAM

Microsoft Azure (Azure Virtual Machines, Storage, App Services, Azure SQL Database)

Version Control: Git, GitHub,

EDUCATION

Jalandhar, India

Bachelor of Technology Punjab Technical University

Phagwara, India

Polytechnic The Punjab State Board of Technical Education & Industrial Training
