

Name: Ravi Krishna Palaparthi

Gmail: prkrishna437@gmail.com

Ph-no: +91 6304492853

Profile Summary:

Results-driven software engineer with 2 years of experience in the automotive domain, specializing in IPC bug and defect management. Proficient in analyzing and resolving software issues using industry-standard tools and methodologies. Strong expertise in C/C++ programming, UI development with XML, and efficient code merging practices. Committed to delivering high-quality software solutions that enhance functionality and user experience.

Educational Qualification:

B.Tech in Electronics and Communication Engineering from Aditya college of engineering, Surempalem, Andhra Pradesh [2018 - 2022].

Professional Experience:

- Completed Internship in Capgemini Engineering [Sep ,2022 – Feb ,2023]
- Currently working as an Associate Software Engineer in People Tech Group, Hyderabad, Telangana [May 1,2023 – present].

Skills:

- Good coding skills in C, C++, XML
- Knowledge in Networking (TCP/IP protocols, OSI Model)
- Skilled in Using Linux (Ubuntu) for Development and Deployment
- Hands-on Experience in Qt creator, WeCAN, Sourcetree, Rhapsody, ODI Simulator, Hmic Designer
- Knowledge in Operating Systems
- Strong Analytical and Problem-Solving Skills
- Effective Communication and Team Collaboration

Project Experience:

- **Project Name:** HMI Development for Instrument Panel Cluster
- **Description:** This project involved development of HMI for an In-vehicle Cluster system. The HMI was developed from scratch as per the requirements provided by the client (General Motors). The project was composed of several modules like Gauges, Alerts, Core, Telltales, Zone1 etc. In my 2-years experience, I covered 5 modules Defects Solving and Development of New Requirements.
- **Client:** General Motors
- **Software:** Qt Creator, IBM Rhapsody
- **Languages:** C, C++, XML

- **Role & Contribution:**

- Managed IPC bugs and defects using Alige and Jira, ensuring timely resolution and improved software performance.
- Developed and implemented software functionality using C/C++ in Qt Creator, enhancing application capabilities.
- Designed and maintained user interfaces using XML, collaborating with cross-functional teams to ensure user-centric designs.
- Utilized HMIcdesigner for effective bindings and IBM Rhapsody for state management in automotive applications.
- Conducted thorough analysis of defects by reviewing logs and issue videos, identifying root causes, and proposing corrective actions.
- Employed SourceTree to create branches and manage code merging on Bitbucket, ensuring smooth integration of fixed code.
