

RAVINDRA REDDY. S
Python Developer

Mobile No: +91-7204273233
Email Id: ravindrarrs33@gmail.com

Professional Summary:

- Having **4+** years of professional IT experience in designing and developing web applications using **Python, Django** and **Django REST Framework**.
- Solid knowledge of **OOP** principles and Data Structures in **Python**.
- Hands on experience with **MySQL** (RDBMS) and **MongoDB** (NoSQL).
- Proficient in **REST API** development and **web service integration**.
- Basic knowledge of front-end technologies such as **HTML5, CSS3** and **React JS**.
- Experienced with **CI/CD** tools such as **Jenkins** and **GitHub Actions** for automated build, test, deployment workflows.
- Proficient in **Docker**: containerization, image building, Containers, Dockerfiles, docker-compose, volumes, networks and Docker Hub.
- Skilled in using **Kubernetes** for **Orchestration**.
- 1.5 years of **AWS** experience, including **EC2, VPC, S3, EBS, ELB, IAM, AMI** and **Route53**.
- Automation via **BOTO3** for AWS service interactions using Python.
- Knowledge of **Terraform** for Infrastructure provisioning.
- Strong problem-solving, decision making, analytical skills, quick learner and team player.

Technical Skills:

- **Languages:** Python
- **Web Frameworks:** Django, Django REST Framework (DRF)
- **Web Technologies:** HTML5, CSS3, JavaScript, JSON
- **Databases:** MySQL, MongoDB
- **VCS/SCM:** Git, GitHub
- **Web Server:** Apache httpd, Nginx
- **Devops Tools:** Docker, Kubernetes, Jenkins, GitHub Actions
- **Infrastructure as Code (IAC):** Terraform
- **Cloud:** AWS
- **IDEs/Editors:** Pycharm, VS Code
- **OS Platforms:** Windows, Linux

Professional Experience:

- Senior Software Engineer | **Miraфра Software Technologies Pvt. Ltd.** | Dec 2024 - Aug 2025.
- Sr. Python Developer | **Silversnake Technologies LLP** | Jul 2023 - Dec 2024.
- Senior Software Engineer | **Mobilution IT Systems Pvt. Ltd.** | Apr 2023 - Jul 2023.
- Senior Member Technical staff | **NEC Corporation India Pvt. Ltd.** | Nov 2021 - Aug 2022.
- Associate Software Engineer | **Continental Automotive Components (India) Pvt. Ltd.** | Aug 2020 - Sep 2021.

Project Details:

Project#1

- **Project Name:** Zapper – Online Food and Grocery Delivery App
- **Tech Stack:** Python, Django, DRF, MongoDB, Git, GitHub, Jenkins, Docker, K8s, Postman.
- **Role:** Python Developer

Description:

Zaperr is an online food and grocery delivery app that connects customers, restaurants and delivery partners.

For Restaurants: Restaurants can log into the app, add food items (veg/non-veg), prices, and offers.

For Customers: Sign up, browse categories (food/grocery), place orders and track deliveries in real-time.

Order Management: Once a customer places an order, the restaurant confirms it, shares preparation and delivery time and notifies nearby delivery partners when the food is ready.

For Delivery Partners: Accept orders and allow customers to track deliveries in real-time.

Roles and Responsibilities:

- Gather and analyze project requirements for design and develop backend modules using **Python** and **Django Web Framework**.
- Perform CRUD operations in **MongoDB** using the **PyMongo** library.
- Built and tested **REST APIs** with Postman.
- Automated CI/CD pipelines using **Jenkins**, integrated with GitHub, Docker, Kubernetes.
- Created **Dockerfiles**, **docker-compose** & Kubernetes YAMLS (deployments, services, namespace).
- Using git commands push the newly implemented code into **GitHub**.
- Resolved bugs, debugged code and collaborated with teams on feature enhancements.

Project#2

- **Project Name:** Heartfulness – Yoga & Meditation Event Platform
- **Tech Stack:** Python, Django, MySQL, Git, GitHub, Jenkins, Docker, Postman, Rest API, AWS
- **Role:** Python Developer

Description:

Heartfulness is related to the yoga institute and meditation centers. Here conducting events like yogmahostav, meditation, event organizer create event template based on the event. This event template has geolocation, template, template_id, template_name and event blocks. Event blocks contains multiple blocks those are event, organizer, volunteer, transport, accommodations, payment, attendance, dajji's, id_cards. Each block performs dynamically and based on the event requirement select the required fields in blocks. Each field has majorly contained field visibility, read/write functionality.

Roles and Responsibilities:

- Developed backend modules, models, views and APIs using **Django** and **DRF**.
- Tested APIs with **Postman** and managed deployments with Jenkins.
- Containerized applications using **Docker** and deployed on **AWS**.
- Integrated **Django** with **MySQL** for data persistence.
- Collaborated with QA/UAT teams for bug fixes and use Jira for sprint deliverables.

Project#3

- **Project Name:** Vendor Data Management System (VDMS)
- **Tech Stack:** Python, Django, REST API, MySQL, NumPy, Pandas, Git, GitHub, Postman.
- **Role:** Python Developer

Description:

Vendor Data Management System (VDMS) is a central server application that handles Parts and Transaction information from a warehouse and to E-Commerce Application, which launches a communication medium using secure web-service. Supportive administration with Transaction reports and Graphs are handled using report manager services.

Roles and Responsibilities:

- Designed and implemented backend modules for vendor and transaction data management.
- Developed and enhanced code to meet evolving **client requirements**.
- Built **RESTful APIs** and maintained API documentation.
- Generated reports and analytics using **Pandas/NumPy**.
- Enhanced features, fixed issues and optimized database interactions.

Education:

Master of Computer Applications (MCA) | JNTU Anantapur, 2016 -2019.
