

# Reshma Dubba

Software Engineer

**Address** Pune, MH 410501

**Phone** 8978671281

**E-mail** reshmadubba27@gmail.com

## Profile Summary:

Accomplished Software Engineer with 3+ Years of experience and proven track record at Electro Pneumatics and Hydraulics, specializing in GUI development and optimization using C++ and Qt. Expert in enhancing user experience through innovative widget customization and performance testing. Demonstrates strong problem-solving abilities and effective collaboration with cross-functional teams. Proficient in HMIC design and versed in using GIT for version control.

## Skills

|                                          |             |
|------------------------------------------|-------------|
| C++                                      | <div></div> |
| IDE: QT 5.15.2, Visual Studio            | <div></div> |
| XML(Customized)                          | <div></div> |
| HMIC Designer (Simulation Env)           | <div></div> |
| BUG Tracking tools: Jira, Harmony        | <div></div> |
| Platforms: MS Windows, QNX               | <div></div> |
| Version Control: GIT, Source tree        | <div></div> |
| Added Tech Specs: Linux, Data Structures | <div></div> |

## Roles and Responsibilities

- Requirement Analysis and design a software solution based on client requirement.
- Design and development of multiple cluster features for ICE and BEV vehicles.
- Did Internal Validation also for my Developed gauges in both Windows and Hardware.
- Understanding the standard reports and real time data views
- Performed root cause analysis for various defects.
- Suggested Solutions for some of critical defects.
- Sending daily status reports on enhancements unit testing and bug fixing.
- Involved in meeting with functional team to understand the functional specification.
- Identifying areas for modification in existing programs and subsequently developing these modifications.

## Work History

2024-03 -  
Current

### Software Engineer

Electro Pneumatics and Hydraulics, Pune, India

#### Design and Develop GUI Applications:

- Created a user interface using Qt framework, focusing on designing and implementing screens with interactive elements such as keypads, buttons, and other widgets.
- Utilized Qt Widgets and QML (Qt Modeling Language) to build and manage custom controls, layouts, and visual elements.

#### Style and Theme Application:

- Applied Qt style sheets to customize the look and feel of the application.
- Ensured visual consistency by creating and implementing reusable style components for buttons, input fields, labels, and other interactive components.

#### Widget Management and Customization:

- Developed custom widgets where required, enhancing user interactions and improving functionality.
- Integrated a third-party widget and created new ones to meet specific application needs, especially when adding interactive features like virtual keypads.

2021-07 -  
2024-03

### Junior Software Engineer

PeopleTech Group Inc, Hyderabad, India

- Worked here in Project involved development of HMI for In-vehicle Infotainment Cluster System. HMI was developed from scratch as per requirements provided by client (General Motors). Project was composed of several modules like Gauges, Info pages, telltales, etc.
- Improved software efficiency by troubleshooting and resolving coding issues.
- Saved time and resources by identifying and fixing bugs before product deployment.
- Contributed for positive team environment through effective communication, problem-solving, and collaboration skills.
- Collaborated with cross-functional teams to deliver high-quality products on tight deadlines.

#### Code Development and Optimization:

- Used C++ and QT built-in classes and libraries to create efficient, reusable, and maintainable code.
- Written modular code to enable easy maintenance and feature expansion.

#### Performance Testing and Troubleshooting:

- Conducted thorough testing of each UI component and screen to ensure performance and responsiveness.
- Debug and troubleshoot issues related to the GUI and its underlying logic, ensuring a smooth user experience.

#### Documentation and Collaboration:

- Documented code, workflows, and procedures for future reference and knowledge sharing.

- Worked collaboratively with team members, including software engineers and UX designers, to align on project requirements and goals.

## Education

2016-08 -  
2019-05

### **Bachelor of Science: ECE**

Dr.KV Subba Reddy College of Engineering For Women - Kurnool, India
