SUMMARY

As an aspiring blockchain developer, I am eager to delve into the core concepts and tools of blockchain technology. With a focus on understanding decentralization, consensus mechanisms, smart contracts, and cryptography, I aim to build innovative solutions. I am committed to mastering platforms like Ethereum, tools such as Solidity, and staying abreast of industry trends. My approach involves continuous learning, experimentation, and problem-solving to excel in this dynamic field.

KEY SKILLS

- **Solidity Programming • Smart Contract Auditing • DApp Development • Protocol Optimization • Blockchain Integration • Code Refactoring**
- **Cryptography • Ethereum Development • Hyperledger Fabric • Decentralized Identity (DID) • Core Java • html • css**

CERTIFICATION

- Certified Blockchain Developer (CBD) | IIT Kanpur | Simplilearn | Jan '24

Rishikesh R Lokhande

B L O C K C H A I N D E V E L O P E R

EDUCATION

Professional Certificate Program in Blockchain by IIT Kanpur year-2024

- **Degree College** **jul 2017' , may 2021**
Sir J. J. Institute of Applied Art.
Grade Second.
- **Higher Secondary Certificate** **jul 2014' , feb 2015**
K. M. Agrawal College.
Grade second.
- **Secondary School Certificate** **jul 2012' , mar 2013**
Swami Vivekanand High School.
Grade second.

ACADEMIC PROJECTS

Election

Voting Capstone Project done at Simplilearn under Blockchain Program..

Online Voting is a trend that is gaining momentum in modern society. It has great potential to decrease organization costs and increase voter turnout. The project delivered within sprints with every sprint delivering a minimal viable product. It was mandatory to do proper sprint planning with user stories to develop all the components of the project

Job Portal

.Deu to lack of awareness of the available jobs and lack of platforms that list them. Middlemen such as Job agencies and contractors connect these workers to job through illegal means and ask for a major portion of their salary as commission.

So as a solution Developing a Dapp using Blockchain Technology that connects workers with Job providers. A worker can register with the portal by creating their profile and uploading labor history, skills, availability, and personal details,

TECHNICAL SKILL Hyperledger Fabric and Blockchain Technology.

- Implemented Ethereum Smart Contracts & Blockchain technology to develop a secure voting system, **significantly reducing incidents of fraud**
- Strengthened voting system security by 50% through the creation of a **tamper-proof & transparent decentralized voting system on the Ethereum blockchain**
- Transformed inventory management, supplier relationships, & shipping logistics with **Hyperledger Fabric**, boosting efficiency by 30%, cutting costs by 20%, & enhancing data accuracy by 25%
- Optimized supply chain processes by 30%, cut costs by 20%, & significantly enhanced transparency through **Hyperledger Fabric & blockchain technology**

TECHNICAL SKILLS

- **Programming Languages:** Solidity, C++, Core Java, Linux
- **Blockchain Development:** Ethereum Virtual Machine (EVM), Smart Contract Auditing, Ethereum Development
- **Code Optimization & Tools:** Code Refactoring, VS Code

Entry Level Position

Blockchain Developer

Present - Present

Internship | remote

NullClass

ADDITIONAL INFORMATION

- Enhanced customer satisfaction by 20% & facilitated seamless communication with team by **fluently speaking Marathi, Hindi, & proficient English**, essential in training new team members & conducting project negotiations with local clients
-
