Key Highlights

- **Transformation Catalyst:** Spearheaded LoB-wide **automation** initiatives that unlocked competitive advantage and operational efficiency at scale.
- **DevOps Champion:** Led **CI/CD** pilots and full-scale implementations, embedding **DevOps** principles to accelerate delivery and enhance reliability.
- **Strategic Architect:** Defined and executed business-aligned IT roadmaps, establishing robust operating procedures and governance models.
- **Problem Solver:** Orchestrated tactical and strategic solutions to complex business challenges, enabling rapid resolution of critical issues.
- **SRE Leadership:** Drove environment stability programs through Site Reliability Engineering, improving system resilience and uptime.
- **Trusted Advisor:** Partnered closely with business stakeholders, offering thought leadership on transformation and IT modernization.
- **Cloud Migration Leader:** Delivered cloud transitions with minimal disruption to business-as-usual operations.
- **Technical Trailblazer:** Expertise in Python, Cloud platforms, API management, and agile methodologies—powering seamless integrations and cross-functional collaboration. Provided leadership on major incidents and related senior management communications
- **People-First Leader:** Recruited, mentored, and led a diverse team of 40+ Platform Engineers across geographies, driving agile delivery and sustained business growth.

Key Skills

Technical		Process/Delivery
• UDeploy/Harness/Puppet	• CI/CD – Jenkins	• Cloud Technologies (PCF, AWS)
• Automation -Ansible/HPOVO	• Grafana/Kibana	• Agile Transformation
• Splunk/AppDynamics/Prometheus	• Mongo/SQL/Oracle	• Site Reliability Engineering
• Docker/Kubernetes/Terraform	• Autosys	• DevOps
• Mongo/SQL/Oracle		• People Management

Notable Career Accomplishments

- **Strategic Portfolio Leadership:** Spearheaded end-to-end IT operations for the entire set of Credit Cards Applications for the Bank alongside the other Unsecured Lending suite of applications including Personal Lending, B2B Services, and Loyalty & Rewards — ensuring stability, scalability, and continuous improvement.
- **Agile Transformation:** Successfully transitioned the portfolio to a squad-based agile delivery model, enhancing predictability, repeatability, and cross-functional collaboration.
- **SRE Implementation:** Led the adoption of Site Reliability Engineering (SRE) practices across the Consumer Technology LoB, significantly improving system reliability and incident response.
- **GenAI Innovation:** Conceived and led the proof-of-concept for a GenAI-powered chatbot to support platform teams during major incidents, driving faster resolution and smarter automation.
- **Automation at Scale:** Directed Ansible-based automation initiatives for Business Continuity Planning (BCP), drift management, patching, and certificate lifecycle—reducing manual effort and improving compliance.
- **Ground-Up Team Building:** Established the Digital Platform team in India from scratch, including talent acquisition, process design, delivery governance, and operational strategy.
- **Cloud Modernization:** Orchestrated the migration of monolithic applications to microservices architecture and successfully onboarded the entire portfolio onto Pivotal Cloud Foundry (PCF).
- **DevOps Enablement:** Drove DevOps implementations across Consumer Banking Technology, enabling automations into SDLC and accelerating delivery velocity.
- **Community of Practice:** Founded and nurtured a Community of Practice for Platform Engineers, promoting best practices, knowledge sharing, and continuous learning.
- **Culture & People Leadership:** Championed the “people discipline” across the practice, cultivating a high-performance culture focused on engagement, ownership, and productivity.

Systems Operations Manager at Wells Fargo (EGS) India Solutions Pvt Ltd**May 2020 – Present**

Strategic leader accountable for IT operations for the entire suite of Credit Card Applications for the Bank alongside the other Unsecured Lending applications including Personal Lending, B2B Services, and Loyalty & Rewards. Driving transformation through SRE adoption, automation, agile delivery, and cloud modernization—while building a resilient, high-performing engineering culture.

Portfolio constitutes of 180+ applications of which most are business critical and high volume (~2.33 billions). Application landscape contains combinations of Java on Linux and .Net on Windows with SQL server, Mongo DB backends. DevOps Tools used are UDeploy, Harness, Puppet, GitHub, Artifactory, Ansible, SonarQube, Grafana, Prometheus, BigPanda, ServiceNow etc.

Key Responsibilities & Achievements:

Portfolio Leadership: Led operations for mission-critical applications, ensuring stability, scalability, and business continuity.

SRE Implementation: Championed Site Reliability Engineering practices, enhancing observability, uptime, and proactive incident resolution.

Automation Excellence: Delivered self-healing capabilities and automated workflows for BCP, patching, drift management, and certificate lifecycle using AMA and Ansible.

Agile Delivery: Established Kanban-based agile squads, daily stand-ups, and dashboards to improve predictability and decision-making.

Strategic Roadmap: Defined and executed IT strategy and operational roadmap for the Unsecured Lending portfolio.

Cloud Transformation: Partnered with application teams to disintegrate monoliths and onboard microservices onto cloud platforms.

Vendor Management: India point of contact for few critical vendors, ensuring seamless integration and performance across the application landscape.

Team Building & Culture: Built and mentored a 40+ member Platform Engineering team, fostering a Community of Practice and driving continuous improvement.

Process Optimization: Simplified and improved change/incident management processes, delivering greater efficiency and reduced downtime.

Upskilling & Resource Optimization: Led skill gap analysis, training initiatives, and resource optimization to deliver expanded scope with lean teams.

Technology Manager at Wells Fargo (EGS) India Solutions Pvt Ltd**June 2011 - May 2020**

Led offshore delivery and operations for Wells Fargo's front-end digital banking applications, driving transformation through DevOps, automation, and proactive service management. Played a pivotal role in modernizing IT support functions and enhancing business value through strategic technology initiatives.

Key Responsibilities & Achievements:

IT Service Management Leadership: Led Build & Deployment, Middleware, Release, and Configuration Management for digital banking applications.

DevOps & Automation: Implemented CI/CD pipelines and automation using tools like Puppet, Jenkins, JIRA, SonarQube, Artifactory, and GitHub across WebLogic/tcServer and Solaris/Linux environments.

Infrastructure Operations: Managed capacity planning, BCP readiness, certificate lifecycle, and access controls for middleware platforms.

Application Development: Led offshore development for SharePoint, JIRA, Confluence, Tableau dashboards, and .NET applications within the digital banking group.

Team Transformation: Shifted operations from reactive firefighting to proactive problem-solving, fostering a culture of automation and continuous improvement.

Team Lead at Wells Fargo (EGS) India Solutions Pvt Ltd**July 2008 - May 2011**

Instrumental in establishing the foundation of Wells Fargo's Digital Banking operations from India. Spearheaded offshore support setup for critical digital applications, laying the groundwork for scalable, resilient technology delivery.

Key Responsibilities & Achievements:

Digital Platform Setup: Played a key role in launching the Digital Banking platform team in India, enabling offshore capability for high-impact applications.

Application Support Leadership: Led the setup of offshore support for the Digital Banking Application suite, ensuring seamless transition and operational readiness.

High Availability Assurance: Maintained continuous uptime and reliability for business-critical digital applications.

Automation Initiatives: Implemented build process automation using AnthillPro and N1 SPS, improving deployment efficiency and reducing manual errors.

Senior Member Technical at ADP Pvt Ltd

March 2005 – June 2008

Key contributor to ADP's India-based Application Support team, delivering high-impact infrastructure and automation solutions for payroll systems. Played a strategic role in optimizing global operations and reducing costs through environment consolidation and process automation.

Key Responsibilities & Achievements:

Application Support Leadership: Served as a lone offshore support member for a ~200-member DEV & QA team, ensuring seamless build, deployment, and troubleshooting.

High Availability Assurance: Maintained uptime and reliability for mission-critical payroll applications used across business units.

Automation Implementation: Introduced build process automation using CruiseControl, streamlining deployment cycles and reducing manual effort.

Infrastructure Optimization: Successfully migrated the entire application non-prod environment—including servers, tools, and scripts—from the US data centre to India, eliminating redundant hardware and costly software licenses.

Software Programmer at Javapoint Pvt Ltd

Nov '01 till Feb '03

Web based Java application development and maintenance

Lab faculty in the training centre

Reliability & Quality Assurance Engr (Contract) at Defence Research Development Laboratory

Apr '98 – Oct '01

Mar '03 – Feb '05

Defence Research Development Laboratory - Quality inspection of physical components based on various international standards

Integrations of components based on the design diagrams/standards

CERTIFICATIONS

Certified Scrum Master (Agile) from Scrum Alliance

EDUCATION

B. Tech in Mechanical Engineering from Government College Of Engineering, Kannur
