Core Competence

- MBA-qualified professional with 18+ years of experience in Project and Program Management, leading strategic initiatives across the US, EU, and APAC regions.
- Proven track record as an enterprising leader with strong capabilities in stakeholder management, cross-functional team leadership, and driving organizational growth through industry best practices.
- Deep expertise in PMO operations, including project scoping, estimation, budgeting, governance, resource planning, and risk management, supported by data-driven decision-making.
- Strong communicator and collaborator with the ability to influence at all levels; thrives in fast-paced, evolving environments requiring strategic agility and delivery focus.
- Adept at solving complex problems and aligning technical initiatives with business objectives, with a sharp analytical mindset for leading digital and technical transitions.
- Advocate for data governance, process standardization, and enterprise solution design, with a focus on driving value and scalability.
- Customer-centric approach with strong business acumen, enabling the deployment of innovative, high-impact solutions.
- Experienced in supervising and mentoring large teams, fostering a culture of **continuous improvement** and professional development.
- Successfully led strategic business initiatives **onsite in the UK and Belgium**, furthering client engagement and **global delivery** impact.

Work Experience

Jubilant Biosys Ltd. | Noida | UP

May'24 – Till now

*Working as **Associate Director – Program Management (PMO)** and leading large and complex projects for multiple pharmaceutical organisations.*

- Support PMO strategic planning cycles in collaboration with VP-level stakeholders to align operational initiatives with business goals.
- Lead creation of program charters, roadmaps, benefits realization plans, and stakeholder engagement models; ensure timely governance reviews with senior leaders.
- Scale PMO frameworks, integrating compliance, governance, and digital transformation execution across \$30M+ portfolios.
- Oversee executive reporting with dashboards and KPI tracking; monitor risks, dependencies, and escalations to ensure proactive resolution and continuous improvement.
- Ensure operational readiness by coordinating across SCM, IT, and commercial teams for timely execution.
- Maintain governance documentation, track approvals, and support regulatory audits with strong compliance performance.
- Allocate program resources, track budgets, and lead performance reviews to develop talent and ensure operational excellence.

- Lead change initiatives involving cross-functional teams and vendor engagement to ensure adoption of new processes with minimal disruption.
- Serve as escalation lead for client issues, contributing to sustained satisfaction and improved NPS.
- Mentor project managers and implement consistent PM practices aligned with PMO maturity models.
- Build and mentor high-performing cross-functional teams; institutionalized delivery best practices and continuous capability development.
- Regularly engage C-suite stakeholders and lead steering committees to ensure strategic alignment and risk mitigation across regions.
- Collaborated with third-party service providers for implementation support, training, and handover, ensuring adherence to SLAs.
- Apply analytics-driven decision-making to optimize execution and track impact on strategic goals.
- Institutionalized governance-driven project planning and introduced tool-based enhancements; Sciforma to scale execution.

Astute Analytica | Noida | UP

Jul'23 – Apr'24

Worked as Freelance Consultant with organisations to help them providing professional research and consulting services

IQVIA India Pvt Ltd. | Gurugram | Haryana

Mar'22 – Jun'23

Engagement Manager (Part of Program core team)

- Led enterprise-level digital and operational transformation programs across global pharmaceutical and healthcare clients, ensuring alignment with regional strategies and compliance frameworks.
- Led programs using Agile/iterative delivery models focused on early value realization, stakeholder feedback integration, and continuous improvement.
- Championed Agile delivery and managed program planning, backlog prioritization, and reporting across cross-functional teams using tools like Jira and Confluence.
- Delivered intelligent automation initiatives to streamline operations, reduce manual dependencies, and enhance client SLAs using platforms like ServiceNow (IT Service Management) and custom automation scripts.
- Applied ITSM best practices in planning and executing process migrations and automation initiatives.
- Spearheaded cross-functional initiatives with internal Ops, Tech, and Product teams to streamline delivery models and meet evolving client needs.
- Supported sales enablement by participating in capability presentations and contributing to client onboarding strategies.
- Worked closely with BA, DevOps, and Data teams to ensure timely execution of program deliverables from requirement gathering through to BAU handover.
- Formulated detailed implementation roadmaps with risk and impact assessments, ensuring timely delivery within defined budgets and KPIs.
- Managed program risks, financials, and quality compliance using agile frameworks and continuous feedback loops.
- Ensured regulatory-compliant project documentation (e.g., Project Charters, SOPs), contributing to audit readiness and operational transparency.
- Led targeted training programs to support tool/process changes and employee development in emerging areas like digital platforms and leadership capabilities.
- Acted as a strategic advisor for operational transformation programs, aligning delivery frameworks with client goals, innovation pipelines, and operational excellence targets.
- Provided detailed project reporting and analytics to senior leadership, aligning program delivery with business KPIs.

WNS Global Services Pvt. Ltd. | Gurugram | Haryana

Nov'10 – Mar'22

Sr Group Manager – Operations

- Headed global delivery for GSK's knowledge center, aligning digital and market research teams across US, EU, EM, and APAC for consistent client engagement and delivery excellence.

- Oversaw Market Research and Digital Marketing teams supporting strategic and operational initiatives for global healthcare clients.
- Served as Product Head for operations, partnering with service lines and delivery teams to design scalable, cost-effective solutions aligned with business goals.
- Developed and presented leadership strategy reports for global management, enabling data-driven performance tracking of key assets vs competitors.
- Conducted advanced data analysis to generate strategic insights, presenting recommendations to client leadership through impactful reports and dashboards.
- Created performance benchmarking reports offering a global view of key brand metrics versus competition for senior leadership and sales teams.
- Introduced analytics-led digital solutions (Python, SQL) to accelerate product innovation and customer engagement for global life sciences clients.
- Established and maintained strong client relationships via structured governance processes and regular feedback mechanisms to identify new opportunities.
- Led hiring, training, mentoring, and career development initiatives for a 30–40 member team, while driving knowledge-sharing and capability-building efforts.
