EDUCATION

KLE Tech University | Hubli, Karnataka

BE in Computer Science

Grad. July 2021 | CGPA **8.42**

Delhi Public School | Bokaro, Jharkhand

PCM with Computer Science

May 2016 | Percentile **80.2**

SKILLS

PROGRAMMING

Languages

- Javascript
- PL/SQL, SQL
- Python
- Cpp

Tech Stack

- Oracle Database
- Oracle Apex
- MERN (MongoDb, Express, React, Node)

Tools

- Git (Version Control)
- Linux

OTHERS

- Teaching
- Debating & Public Speaking
- Photography & Poetry
- Drawing & Sketching

ACHIEVEMENTS

- Reward & Recognition 2023 for quality work and team support at BOSCH.
- Featured in esteemed daily like Deccan Herald for best product development.

EXPERIENCE | 3.5+ Year

LTIMindtree | Sep 2024 - Present | Senior Engineer

- Working with Oracle BU, developing database applications for Data Service team.
- Migrating sharepoint app into Oracle Apex, enhancing the capabilities **2 folds** using apex-collections and other advanced apex features.
- Real time notification system for stakeholders in app and email.
- Worked on latest **workflow feature** in Oracle apex 23.2 to design user action approval system
- Working with cross platform and cross regional team of 12.

Robert Bosch | Aug 2021- Aug 2024 | Senior Software Engineer

- Developing web-based applications for Bosch Plants across the world, using technologies like **Oracle database, PL/SQL, SQL, Oracle Apex, Javascript**.
- Expertises in **Apex Collections**, Dynamic Actions, Reports, grids, javascript apis and all advance Apex features
- Writing efficient,scalable, modular and reusable **PL/SQL** functions and procedures in packages.
- Working with **data-valut** architecture of database to maintain historical data.
- Developing seamless **UX** in APEX explicitly using Javascript
- Involved in **Testing** and **deployment** through **Jenkins**.
- Built **notification system** that can be used globally across the application, can be used by developers to define custom notifications.

Robert Bosch | Intern | March 2021- June 2021

- Worked with health-care department to develop mobile based applications using **Android-Studio** and **Java**.
- Developed a wifi module interface which allows IOT devices to communicate with mobile and share data.
- Developed more than 40 responsive UI screens for the health care application.

RESEARCH | 2 Year (Intern CVG labs)

Computer Vision & Graphics Lab (KLE Tech) | 2020-2021

- Worked on government sponsored project to restore the submerged archeological sites in Dwarka (Gujrat) and Pumpuhara (Tamil Nadu)
- Technologies Used - **Image Processing & Machine Learning** using **Python**.
- Successfully Designed a mathematical model generating realistic looking 40,000+ underwater images, to be server as training dataset for a GAN based pix-to-pix neural network.
- We achieved 60% better results when compared to other global restoration models Our research work served basis for research papers for CVG.
