TECHNICAL SKILLS

- Power BI (desktop/Service)
- PostgreSQL
- SQL
- Python
- ETL process
- Azure Databricks
- Tableau
- Power BI Template Apps
- MS Fabric
- Power Query

SUB SKILLS

- Advanced MS Excel
- Agile Methodology
- DAX Queries
- Data Driven
- Design Principles
- Data Model
- Dataset
- Data Mapping
- Jira
- Key Metrics
- SQL Server
- Data Analysis
- Lookup Table
- Pivot Table
- Project Management

CORE COMPETENCIES

- Requirement Gathering
- Wireframe
- Commitment to data accuracy
- Data Modelling
- Data Integration
- Dashboard Design
- Version Control and Deployment.
- Daily Status Report
- Software Development Lifecycle
- Production Support

SOFT SKILLS

- Quick learner
- Time management
- Analytical thinking
- Critical thinking

CERTIFICATIONS

- Microsoft Certified: Power BI Data Analyst Associate
- Databricks Certified Data Engineer Associate

KEY PROJECT

- Client:** Hillrom T2T Migration
Role: Data Analyst
Tools Used: Power BI Service & Desktop
Highlights:
 - Migrated workspace objects using PowerShell scripts, achieving a 40% reduction in migration time.
 - Enhanced report functionality through effective migration and verification of data lineage.
 - Updated dependencies and documented inventory analysis for seamless reporting.
 - Redesigned Power BI dashboards and apps to improve user experience and addressed manual remediation of workspace objects.
- Client:** Hillrom IPUP
Role: Data Analyst
Tools Used: Power BI Service & desktop
Highlights:
 - Collaborated with clients to design and format Power BI dashboards according to specifications and branding guidelines, ensuring deliverables met client expectations.
- Client:** Avasoft- Reporting Hub
Role: Data Analyst
Tools Used: Power BI Service, Power BI desktop and Azure Databricks
Highlights:
 - Defined and documented business objectives and requirements for Power BI dashboards.
 - Coordinated with a cross-functional team to create mock visuals.
 - Designed and developed data models and DAX calculations, increasing visualization efficiency by 30%.
 - Reduced validation errors by 20% through robust data model development.
- Client:** Mode Global
Role: BI Developer
Tools Used: Power BI Service, Power BI desktop and SQL server
Highlights:
 - Engaged with stakeholders to define Power BI dashboard requirements aligned with business objectives.
 - Produced and refined mockups in collaboration with cross-functional teams.
 - Enhanced data visualizations, increasing stakeholder satisfaction by 25%.
 - Improved visualization speed by 20% through effective design strategies.
- Client:** Sales Team
Role: Data Analyst
Tools Used: Power BI Service, Power BI desktop and Excel
Highlights:
 - Designed a sales and finance dashboard that automated reporting and provided real-time insights.
 - Utilized Power BI for advanced data visualization, enhancing report clarity for stakeholders.
 - Aligned with cross-functional teams to integrate financial data from multiple sources.
 - Achieved a 50% reduction in manual data handling through effective integration strategies.
