TECHNICAL SKILLS

- Neural Networks
- Deep Learning
- NLP
- GenAI
- Data Analysis
- Machine Learning
- TensorFlow
- Keras
- PyTorch
- MySQL
- Web Scraping
- Docker
- AWS
- Deployment
- LLM
- PySpark
- Tableau
- MS Excel

PROGRAMMING LANGUAGES

- Python
- C++
- C

EDUCATION

Bachelor of Technology,
CSE

Maharaja Surajmal
Institute of Technology

2017-2021

Aggregate Percentage:
87.2%

ACHIEVEMENTS

[Google Certified](#)
[TensorFlow Developer](#)

PROFILE

I'm a Data Scientist with close to 3 years of broad-based experience in building data-intensive applications, overcoming complex architectural, and scalability issues across multiple projects. Proficient in Data Modelling, Predictive Modelling, Statistical Analysis, as well as Bash scripting. Capable of creating, developing, testing and deploying highly adaptive diverse services to translate business and functional qualifications into substantial deliverables.

PROFESSIONAL EXPERIENCE

FLIPPED.AI

Cloud Machine Learning Engineer

Feb 2024 - Present

- Developing **NLP Algorithm** to extract all the details from the CV provided on the website, with over **90% accuracy**.

CISCO SYSTEMS

Software Engineer

Jan 2021 - Sep 2023

- Developed predictive models using TensorFlow, **reducing forecasting errors by 31%**.
- Deployed multiple containerised models to the internal applications, using **Docker**.
- Utilised Pandas and Python for data manipulation, resulting in 2-hour reduction in data cleaning time.
- Led automated deployment scripts and version control using Git, resulting in a 20% reduction in deployment errors.
- Worked with UCS Rack Server team, assisted in creating multiple C-based APIs, **reducing the run time of the application by 58%**.

BLITZJOBS INC.

Data Mining Intern

Jun 2020 - Aug 2020

- Automated **Web Scraping** using **Beautiful Soup** and **Python Scripting**, **resulting in 70% improvement** of run-time compared to the legacy algorithm.
- Displayed a working knowledge of **Data ETL, Visualisation, API frameworks**, and **statistical methods in Python** to develop visualisations and implement analyses.
- Implemented 13+ unique ways to increase access efficiency by creating indexed views in the existing MySQL tables.

PROJECTS

DAILY REVENUE PREDICTION

[GITHUB](#)

- Implemented a **Time Series Analysis** and **Prediction Model**, powered by **LSTM**, with a **look-up** and **look-back** period of **30 days**.
- Performed **Random Forest Hyperparameter Tuning** using **keras-tuner**, **resulting in a 14% improvement** over the base model.

CIFAR10 CNN IMPLEMENTATION

[GITHUB](#)

- Developed a custom CNN to classify among the images present in the CIFAR10 dataset of **keras**.
- Implemented multiple layers of **Conv2D** and **MaxPooling2D**, alongwith **Batch Normalisation** and **Dropout** which produced a **model with 89% accuracy**.

SALES PREDICTION

[GITHUB](#)

- Implemented a **XGBOOST** algorithm, predicting the sales based on the **Multivariate Dataset**.
- Performed **Grid Search Hyperparameter Tuning** to fetch the best combination of both **n-estimators** and **max-depth**.
- Performed **A/B Testing** to extract the most prominent features for the model and showcase their impact on the model with **Data Visualisation** and an **Executive Summary**.
