

Career Overview

AS A DYNAMIC SOFTWARE TEST ENGINEER WITH OVER 4.5 YEARS OF INDUSTRY EXPERIENCE, SPECIALIZE IN QA AND PRODUCT MANAGEMENT. PROFICIENT IN ALL PHASES OF THE SOFTWARE DEVELOPMENT LIFE CYCLE(SDLC) AND SOFTWARE TESTING LIFE CYCLE (STLC). AS A GOAL-ORIENTED AND HARDWORKING PROFESSIONAL, I AM SEEKING A CHALLENGING POSITION TO LEVERAGE YOUR SKILLS.

Skills & Tools

TESTING:

- 1) Automation Testing.
- 2) Manual Testing.
- 3) Functional Testing.
- 4) Black Box Testing.

PROGRAMMING LANGUAGES:

- 1) Core Java.

AUTOMATION TOOLS:

- 1) Selenium WebDriver.
- 2) Maven.

DEFECT MANAGEMENT:

- 1) JIRA.

FRAMEWORKS:

- 1) Page Object Model (POM)
- 2) Cucumber.
- 3) TestNG.
- 4) Data Driven.

CI/CD TOOLS:

- 1) GIT.
- 2) Jenkins.

DATABASE:

- 1) SQL.

API:

- 1) Postman.
- 2) Rest Assured.

AJAY SHANKAR

Software Test Engineer

ajayshankar1502@gmail.com

PROFILE SUMMARY

- Having 4.5 years of experience in various forms of testing including **functional**, **manual**, and **automation**.
- Proficiency in Web UI Automation using **Selenium Web Driver** and **Java**.
- Solid understanding of Requirement Specifications and Design Documents.
- Familiarity with all aspects of **Software Development Life Cycle (SDLC)** and **Software Testing Life Cycle (STLC)**.
- Hands-on experience with **XPATH**.
- Proficient in using **Maven** for build and configuration, and for implementing the **Page Object Model** in web application automation testing.
- Experience in implementing **Data Driven** and **Cucumber BDD** Testing Frameworks.
- Knowledge of Unit Testing Frameworks, particularly **TestNG**.
- Proficient in using **GIT** for source version control.
- Having experience with the CI/CD tool **Jenkins**.
- Experience in Defect tracking tool like **JIRA** and providing efficient reports on defect status.
- Strong experience in **Agile Methodology**.
- Proven ability in problem-solving, process improvement, analytical skills, client handling, reporting, and assisting managers, both individually and as part of a team

WORK EXPERIENCE

E-HORIZON SOFTWARE SOLUTION, PUNE

Senior Test Engineer

June 2019 – Present

Project - 2: Conn's Web Application

Duration: 24/11/2021 – Present

Project Overview:

The project involves developing and executing an automated testing frame-work for our client, a prominent American re-tail chain. Our main goal is to ensure the functionality, re-liability, and performance of their official web Application. Additionally, we will validate the user experience and ecommerce features to guarantee a seamless online shopping experience.

Responsibilities:

- Reviewing system requirement specification, technical specification, and functional design document to achieve better understanding of the project.
- Work within an Agile environment, participating in sprint planning, stand-ups, and retrospectives.
- Create and execute manual test cases to validate software functionality, ensuring that the software meets the specified requirements.

EDUCATION

B.E-MECHANICAL

Aarupadai Veedu Institute of Technology, Chennai.
2013 - 2017

HSC

Jaigopal Garodia Vivekananda
Vidyalaya Matric Higher
Secondary School, Chennai.
2011 – 2013

FUNCTIONAL

- Understanding business requirements through the analysis of necessary documents.
- Performing various types of testing including Sanity Testing, Smoke Testing, Functional Testing, and Regression Testing.
- Preparing daily status reports to track the progress of deliverables.
- Involvement in multiple phases of the project including analysis, design, and construction.
- Preparation and execution of Test Cases, capturing Test Results, and reporting bugs to developers.
- Providing Knowledge Transfer to new members of the project team.
- Direct interaction with the client's business team to understand their requirements and objectives.

ADDRESS:

1/147, "O" Block, 36th Street,
Ganapathy Colony, Anna Nagar East,
Chennai – 102.

- Implemented UI part Automation using Selenium-Web driver automation framework following the Page Object Model (POM) design pattern for web application testing.
- Ensuring test environment readiness and data management, providing a stable and consistent testing environment.
- Executed the test scripts and reported the defects through defect tracking tool (Jira).
- Write SQL queries for database testing and validation.
- Identify End to End Test scenarios for Both Manual & Automation Testing.
- Perform compatibility testing across different web browsers.
- Utilize Postman for manual API testing, validating the functionality, reliability, performance, and security of APIs.
- Assist in User Acceptance Testing (UAT), ensuring the software meets user expectations.

Project - 1: Poshmark Web Application

Duration: 10/09/2019 to 17/11/2021

Project Overview:

As a Senior tester on the Poshmark website, I played a pivotal role in ensuring the quality, reliability, and security of this prominent e-commerce platform. Poshmark is a dynamic online marketplace, and my testing efforts spanned various aspects. I collaborated closely with cross-functional teams to develop and execute comprehensive testing strategies, guaranteeing an exceptional user experience and safeguarding customer data. My contributions helped maintain the platform's robustness and contributed to its reputation as a trusted online marketplace.

Responsibilities:

- Create and execute manual test cases to validate software functionality, ensuring that the software meets the specified requirements.
- Create and execute automated test scripts using Java and TestNG, ensuring comprehensive coverage and efficient testing.
- Implemented UI part Automation using Selenium-Web driver automation framework following the Page Object Model (POM) design pattern for web application testing.
- Implement behaviour-driven development (BDD) using Cucumber with Gherkin syntax, enhancing the readability and understandability of test cases.
- Integrate automation into CI/CD pipelines with Jenkins, ensuring continuous testing in the development process.
- Executed the test scripts and reported the defects through defect tracking tool (Jira).
- Conduct data-driven testing by reading data from various sources enhancing the scope and coverage of testing.
- Implement Rest Assured for automated REST API testing, enhancing the efficiency of API testing.
