- Professional with overall experience of 6 years in IT industry. 4.4 years of experience in Software Testing (Manual & Automation)
- Domain Experience: E-commerce, Telecom, Insurance
- Technical Skills: Selenium, TestNG, Maven, Java, Jira, Postman, SOAP UI, T-SQL, Mocha, Epsilon, Rest Assured

Work Experience

IT Analyst

TCS (Contractor)

April 2022 to Present

Projects: Insurance client

Project Description:

A leading financial services group, originally established as a life insurance company. Client provides financial solutions to individual and institutional entities.

The project I worked for the client is a transformation of existing customer communication document from Mtext, Eloquence and Print Engine to OpenText Exstream.

Responsibilities:

In Agile environment, attend daily internal and client stand up meetings.

Involve in Unit Testing, SIT Testing, End to end testing.

Design and develop Test cases and generate meta data based on Business Requirements document.

Generate XML and JSON files based on the Test cases.

Log the defects in JIRA in order to perform defect lifecycle.

Involve in defect review meetings, weekly status meetings.

Participate in walk through sessions and interact with Business Analysts and Developers for resolving defects.

Manipulate data in MS SQL Server databases to perform tests.

Use Postman and MOCHA to generate letters for comparison testing.

Use Bamboo pipelines to perform comparison testing.

Perform retests for the defects solved by the developers to ensure no more defects present.

Tools Used: SSMS, T-SQL, Postman, Mocha, Epsilon

QA Test Engineer

Teamacesys

September 2019 to April 2022

Projects:

- Bespoke Table Company

Responsibilities:

Understanding the requirement specifications and design documents.

Preparing test scenarios based on functional requirement specifications.

Developed test framework using TestNG and Selenium web driver-Java.

Involved in preparing test scripts for Test automation.

Wrote X-path to identify web elements in the application in such way they would work on multiple browsers.

Inserted checkpoints in the test scripts to verify the output data.

Conducted smoke, functionality and regression testings.

Record test results and report and verify software bug fixes to accept automation criteria.

Perform regression testing after bug fixation and modification.

Implemented Page Object Model for reducing code duplication.

Tools Used: Selenium-Java, TestNG, Jira

- Telecom Client

Responsibilities:

Perform system testing on PEGA CDH.

Write use cases to perform the tests.

Update data in databases to perform the tests.

Log defects in Jira and work with developers to fix the issues identified.

Re-test the modules fixed by the developers.

Tools Used: Postman, SOAP UI, pgAdmin, Jira

- OSE Directory

Responsibilities:

Involved in creation of the test cases, test scenarios and test data.

Participated in test strategy.

Worked in GUI and Functional testing, using Black box testing techniques.

Worked in test execution, result analysing and defect reporting.

Tools Used: TestRail

Project Assistant

BSS Smart Mission

October 2009 to December 2010

Project: SmartIndia

Description:

A web portal to develop several soft skills for the students at school as well as at home across the rural areas of India, a mission started by National Development Agency.

Responsibilities:

Co-ordinate with different teams to understand the requirement.

Prepare the requirement document and work with development team

Ensure the development team understand the requirement.

Work with development team to assess the effort thereby timeline the work.

Junior Software Programmer

COMDEX Infotech - Bangalore, KARNATAKA, IN

May 2008 to November 2008

Projects: Healthcare management system

Description:

Healthcare management system was designed for hospitals to cover a wide range of hospital administration and management process. It was an integrated end to end hospital management system that provides relevant information across the hospital.

Responsibilities:

Involved in studying and understanding the product.

Assisted in developing the module for the project.

Declaration:

I hereby confirm that the above given details are true to the best of my knowledge.

Date:

Place: Bangalore ANN NEENU STEAPHEN

Education

B-Tech in Computer Science

Cochin University of Science and Technologies - Kochi, Kerala

Skills / IT Skills

- Have 3 years of experience in manual testing.
- Defect Reporting and tracking using tools like TestRail, Jira.
- Knowledge in Test design techniques like Equivalence Class Partitioning and Boundary value analysis.
- Basic knowledge in Java and SQL.
- Worked in Regression, Smoke, Sanity, Functional and UAT testing.
- Participate in code review meetings. Manual Testing:
- Have work experience in writing test cases, executing test cases and Agile methodology.
- Develop automation test script and execute automated test cases on new builds and versions.
- Prepare and sending test reports.
- Experience in Automating Web Application Testing using Selenium WebDriver with TestNG framework.
- Basic understanding of Git repositories.
- Worked in re-testing and defects fixed by developer.
- Well acquainted with Software Development Life Cycle, Software Testing Life Cycle and Bug life Cycle.
- Have 1.4 year of experience in Selenium Automation tool.
- Automation Testing:
- Involved in Black box testing methodologies like Functional Testing, Smoke Testing, Integration Testing, System Testing, Regression Testing and UI Testing.

- Execution of Test scripts on multiple browsers.
- Good knowledge in Maven, Page Object Model, TestNG.
