

A SARANYA

ETL TEST ENGINEER

Contact

+91 - 6379120171

saranyacs266@gmail.com

Skills

- **Database** : Oracle DB
- **Language** : SQL
- **ETL Tools** : Oracle SQL Developer, SSIS, JIRA, AWS Redshift, ICEDQ
- **Operating Systems**: Windows family, Unix

Education

● Bachelor of Computer Science

Fatima College
2006-2009

● Master of Computer Science

Thiyagarajar College
2009-2011

Project 1

- **Clients** : RFZO
- **Domain** : Health Care
- **Environment** : Oracle 12c, Unix
- **Role** : ETL Tester

Profile Summary

- Having 5+ years of experience in IT industry and performed ETL testing and database testing with skills of Oracle SQL, UNIX, SSIS and ETL concepts.
- Expert in developing, testing, and deploying ETL solutions. Proficient in SQL Queries and SSIS validations.
- Experience in UNIX commands and SQL Joins, Group functions, Analytical functions and Sub queries.
- Experience in Fact table and Dimension table analysis.
- Proficient in SQL Queries and SSIS validation and remarkable experience with planning ETL process and creating source to target mappings.
- Worked in the UNIX commands like Grep, sed, Awk, Kill, find etc. to process the files in the Unix environment. Extracted data from various sources like Oracle, flat files, Sqlserver.
- Co-ordination with BA and Development Team on understanding the requirements.

Experience

Working as a ETL Test Engineer In **INDIX INFO SYSTEMS** ,Chennai from 2018 to till date

Project Details

● Roles and Responsibilities

- Working closely with business teams to understand the requirements, functionality and design.
- Understanding the BRD's and FSD's and preparing Test plan and testing scenarios with Test data to exhaustively cover the testing of clients requirements spanning across score, Interfaces and local customization.
- Testing a number of complex ETL mappings, mapplets and reusable transformations for daily data loads.
- Creating test cases for ETL mappings and design documents for production support involved in Built-in activities. Monitoring internal defects logged and ensuring closure of each item.
- Chasing respective developers/environment teams to get faster resolution on Critical and High priority defects.
- Escalation of the issues wherever faced to the appropriate authorities to bring it up to their notice and getting immediate resolutions.

Project 2

- **Clients:** Al Bilad Investment Bank AB
- **Domain :** Investment Banking
- **Environment :** Oracle 12c, Unix
- **Role :** ETL Tester

Roles and Responsibilities

- Evaluated the source, staging, and target data when conducting a project analysis.
- Created SQL queries using sub-queries, joins, groups, and analytical functions to carry out the test cases.
- Examining the number of records in the Source and Target environments.
- Compiling and organizing test results, defect lists, and test reports.
- Using SQL, application data was analyzed to determine the ETL processes, and SQL queries and stored procedures were created and modified for quality control and analysis.
- The developers are informed of any defects found in the testing environment.
- Managed ETL processes, ensuring efficient data loading and transformation in AWS Redshift for improved data analysis. Verify the accuracy and completeness of data stored in Redshift.
- Participated in the Scrum Meeting and provided an update on the daily activities' status.

Declaration

Hereby I declare that the above details are true to knowledge and best of my belife.
