SUMMARY

Seeking an entry level position in field of mechanical engineering that will help me to utilize and enhance my technical, software and knowledge skills while making a significant contribution to the success of the company and for the welfare of my family and society. Strong problem-solving skills and ability to work effectively in a team-based environment.

SKILLS

- Auto-Cad
- Communication
- Team work-----
- Emotional Intelligence
- Analytical skills
- Flexibility
- Leadership
- Organization Skills

INTERNSHIPS / WORKSHOPS

- Attended a 12-Days Industrial training in Regional Workshop , **KSRTC Kozhikode** (23/07/2018 to 03/08/2018) I completely involved in all operation in the workshop. Mainly I try to work with the labors and try to understand the basic technology behind each machine parts
- Attended a 14 Days internship in **AUTOKAST Limited**, Cherthala I completely involved in the whole process in the company. I got a chance to understand the manufacturing process of wheel assembly of Trains. Participated in CNC work and Design of molding and parts.
- Attended a workshop on Introduction To Robotics offered by **ICT Academy under SDPK**, Higher Education Department - Govt of Kerala .
- Attended a 3 days long workshop on Industry 4.0 Machine Learning conducted by **CUSAT**.

EDUCATION

B.Tech Mechanical Engineering 8.57% CUCEK Cochin University of science and technology	2019-2022
Diploma (Mechanical Engineering) 8.19% State board of technical education Kannur government polytechnic college	2016-2019
Pre Univesity (12th) 80.5% Kerala state board Higher secondary school, Mambaram	2015-2016
High School (10th) 90% Kerala state board Higher secondary school, Mambaram	2013-2014

POSITIONS OF RESPONSIBILITY

- Coordinator, Placement Assistance Cell ,CUCEK
- Volunteer NSS
- NCC Cadet
- Finance Head-Sattva 2022 ,CUSAT
- Member of NSS Blood Donors Club
- Volunteer Covid-19 ,Govt of Kerala
- Volunteer of Kerala Flood Relief Program

PROJECT EXPERIENCE

Project 1: Multi functional mixer grinder

- The aim of the project is to develop and modernized process for grinding and scraping of coconut.
- So our product is very helpful to reduce the effort of scraping and grinding of the coconut.

Project 2: Electricity generation using waste heat from IC engines

- The project focuses on extracting energy from waste heat produced by an internal combustion engine. It involves using a thermoelectric generator positioned at various locations on the engine to generate electrical energy
- The efficiency of each placement is compared to identify the most effective configuration for energy extraction.
- The project aims to determine the optimal placements for thermoelectric generators on an internal combustion engine to extract electrical energy from waste heat'
