AAMIR HUSSAIN

Data Science & Machine Learning Engineer.

SUMMARY:

Experienced Data Science professional adept at driving innovation and informed decisions using insights. Skilled in data cleaning, exploration, and modeling to uncover valuable patterns. Proficient in advanced tools for complex dataset processing and process optimization. Proven success in predicting behavior and enhancing efficiency. Adept at converting raw data into actionable intelligence for decision-making. Eager to contribute Data Science expertise for growth and impact.

TECHNICAL SKILLS:

Data Science & Business Analytics, Machine Learning, Deep Learning, NLP, spaCy, Data Visualization, AWS Cloud, Docker, Advance Excel, PowerBI, Tableau, Git & GitHub

PROGRAMMING LANGUAGES:

Python, R Language, Basic JavaScript, MongoDB, MySQL, MsSQL-Server, HTML5, CSS, Django, Flask,

PROGRAMMING LIBRARIES:

Numpy, Pandas, Pytest, PySpark, Matplotlib, SeaBorn, SK Learn, Request, Beautiful Soup, Selenium, TensorFlow, Keras, OpenCV.

TOOLS:

Anaconda Jupyter, PyCharm, VS-Code, SubLime Text, MS-Office.

EXPERIENCES:

RAILOFY, Mumbai - Internship As Python Developer With Data Science Team

Sep 2023 - Dec2023

- During my tenure, I leveraged sensor data analysis to ensure optimal performance and longevity of rail assets, contributing to enhanced maintenance strategies and operational efficiency at Railofy.

Angel Virtual World, New Delhi- Internship as Python Developer in Algo Trading

January2023 - June 2023

- Developing and implementing Python-based algorithms and strategies for automated trading in financial markets.

- Collaborating with traders, researchers, and team members to analyze market data, backtest trading models, and optimize trading strategies.
- Continuously monitoring market performance and fine-tuning strategies to ensure effective and profitable automated trading.

A.S Enterprises Pvt Ltd, New Delhi- Sr. MIS_Executive with Analysis Team.

January 2019 - December 2022

- As a sales professional, I possess advanced Excel skills, utilizing data analysis and visualization to drive effective sales strategies.
- I excel at generating comprehensive sales reports, analyzing trends, and identifying growth opportunities, enabling data-driven decision-making.
- Streamlines processes, optimizes workflows, and boosts sales with Excel's advanced features.

Dashmesh Enterprises. New Delhi as Sr. Sales Verifier

Jun2016 - December 2018

- As a Sr. Sales Verifier, I leverage my advanced Excel proficiency to analyze sales data and visualize trends, driving effective sales strategies.
- My expertise lies in generating comprehensive sales reports and identifying growth opportunities, enabling data-driven decision-making to optimize sales performance.
- With a focus on streamlining processes and utilizing Excel's advanced features, I successfully verify and enhance sales strategies for increased efficiency and success

PERSONAL PROJECTS:

Recommendation Engine:

- Developed a recommendation engine using collaborative filtering and content-based algorithms.
- Leveraged user behavior and item characteristics to provide personalized recommendations, enhancing user engagement and driving revenue growth.
- Successfully enhanced the user experience, increased customer satisfaction, and boosted overall business revenue through the personalized recommendations.

Twitter Sentiment Analysis with Python

- Utilized NLP techniques to analyze customer reviews and determine sentiment (positive, negative, or neutral).
- Leveraged popular NLP libraries (NLTK, spaCy) for text preprocessing and feature extraction.
- Trained a machine learning model (e.g., Naive Bayes, SVM) on large volumes of customer feedback for informed decision-making and improved customer experiences.

Fraud Detection:

- Built a fraud detection system with anomaly detection techniques and machine learning algorithms.
- Analyzed transactional data to identify patterns and anomalies for minimizing financial losses and improving security measures.
- Successfully enhanced the security of financial systems and safeguarded against potential fraudulent threats.

Customer Churn Prediction:

- Developed ML model to predict customer churn, enabling proactive retention strategies.
- Utilized historical data, feature engineering, and classification algorithms to identify at-risk customers.

- Significantly reduced churn, enhancing business sustainability and growth.

Predictive Maintenance:

- Implemented predictive maintenance using sensor data and ML models.
- Predicted equipment failures, optimizing maintenance schedules and reducing downtime.
- This solution led to increased operational efficiency and cost savings, ensuring equipment reliability and minimizing disruptions.

Customer Segmentation for E-commerce:

- Developed customer segmentation model using K-means clustering for personalized recommendations.
- Analyzed transactional data and behavior to identify distinct customer segments.
- Enhanced customer engagement, conversion rates, and sales with targeted strategies.

EDUCATION & CERTIFICATION:

Diploma in Data Science and Business Analytics - Emphasis on Machine Learning & Deep Learning

At Tech Stack Academy , Saket - South Delhi

Jan 2022 - Nov 2023

- Accomplished and certified in Data Science and Business Analytics, showcasing specialized proficiency in Machine Learning. Evidenced through a senior project that effectively predicted bank loan defaulters using Logistic Regression and Random Forest algorithms.

GRADUATE AT MAGADH UNIVERSITY -PATNA (BCA)

- ❖ I successfully completed my BCA degree with a remarkable 72% from Magadh University in Patna, showcasing my dedication to academic excellence and acquiring invaluable expertise in computer applications.

INTERMEDIATE FROM S.R.K GOENKA COLLEGE SITAMARHI (BIHAR)

- I have completed my Intermediate with a Science stream, encompassing Physics, Chemistry, and Mathematics (PCM), achieving a commendable 58% result.

Academic Achievement AT S.M.N.HIGH SCHOOL- 10th Grade (BIHAR)

- ★ Successfully completed 10th grade with a solid performance of 55%.

Total Work Experience:

3 Year Experience As Sr. Sales Verifier , 3 Year Experience As Sr. MIS Executive.

6 Months Internship As Python Developer In Algo Trading And Also Have 6

Months Internship As Data Science Machine Learning At Railofy.

*Total One Year Internship Experience As Python Developer & Data Science

INTERESTS:

AI,ML,DL & SOFTWARE

LANGUAGES:

English , Hindi

PERSONAL INFORMATION:

Name:	:	Md.Aamir Hussain
Father Name	:	Md Suleman Hussain
Gender	:	Male
Marital_Status:	:	Single
