EXPERIENCE

SDET-1

SDET Technologies

April 2023 - Current

1.6 yrs

- Designed and implemented automation architecture for Eggplant Functional, optimizing data flow and scalability, resulting in a 25% improvement in test execution speed
- Developed and maintained a robust Page Object Model (POM) framework within Eggplant, achieving a 30% reduction in maintenance time for test scripts
- Implemented advanced automation strategies, increasing test coverage by 40% and improving reliability in handling complex scenarios and edge cases
- Collaborated with cross-functional teams to establish automation standards and best practices, reducing manual intervention by 50% through automation
- Designed and implemented multisystem testing strategies using Remote Desktop Protocol (RDP) for remote machine access, enhancing testing capabilities across diverse environments
- Led initiatives in configuring and optimizing remote machines for automated testing, ensuring compatibility and stability across different platforms
- Worked closely with infrastructure teams to optimize performance, achieving a 30% reduction in setup time for remote testing environments

Test Automation Engineer

SDET Technologies

Promoted On April 2024

- Implemented Selenium (Java) and Robot Framework for end-to-end UI testing, achieving a 30% reduction in scripting time through modular test design
- Applied Behavior-Driven Development (BDD) principles extensively with Robot Framework, improving collaboration and test case clarity
- Developed modular and reusable automation scripts using Robot Framework, reducing maintenance efforts and improving scalability across projects
- Integrated Python libraries within Robot Framework, extending functionalities and enhancing test coverage across complex scenarios
- Contributed custom Robot Framework libraries to optimize test execution and enhance framework capabilities
- Streamlined CI/CD pipelines with Jenkins integration, automating test workflows and accelerating feedback cycles by 40%
- Explored and implemented generative AI techniques within Robot Framework, pioneering innovative approaches to automated testing

Software Test Engineer

SDET Technologies

Promoted On Oct 2023

- Contributed to the creation and execution of comprehensive test plans, ensuring coverage of functional and non-functional requirements
- Performed manual testing activities, including test case creation, execution, and defect logging, improving defect detection rate by 20%
- Conducted cross-browser compatibility testing using BrowserStack, ensuring consistent user experience across major browsers
- Managed bug tracking and resolution process using Jira, maintaining accurate and up-to-date records of defects
- Engaged in mobile testing, evaluating application functionality and usability across Android and iOS platforms

- Utilized Selenium with Java and Python Selenium for UI automation, developing and executing automated test scripts to improve testing efficiency
- Implemented test automation frameworks in Selenium with Java and Python Selenium, enhancing script reusability and maintainability
- Collaborated with development teams to analyze test results, identify root causes of issues, and ensure timely bug fixes

PROJECTS

Sh-Auto Library(Ongoing : shAuto-AI)

- Self-healing python automation library
- Integrated ML Models for self-healing and Machine visions
- Automates based on image, xpath-locators and have capability of OCR vision

University Exam Portal

- Developed using Java, JavaFX, MySQL Database
- Implemented POM for structured code organization

Learn Free Tech Android App

- Utilized Firebase RealTime Database and Authentication
- Integrated OpenAI GPT3.5 API for enhanced functionalities

SKILLS

Programming: Java, Python, Data Structures, Algorithms, Robot Framework, Selenium (Java/Python), Git, Jira, Jenkins, MySQL, Cucumber, PyTorch, PyTest, Spring Framework, Spring boot, CSS, HTML, JavaScript, Android Development

Automation Tools: Robot Framework, Java Selenium TestNg, Python Selenium Pytest, Eggplant Functional and DAI

Soft Skills: Leadership, Resourcefulness, Zeal to Learn, Ambitious, Motivated
