Mobile No: 8264812138

OBJECTIVE

Aspiring for a promising and motivating career in the domain of Software Test Engineer where my skills, Knowledge and spirit for teamwork would be an asset to the organization.

PROFILE SUMMARY

- Good in AWS , DevOps and Linux.
- Knowledge in Build and Release pipeline.
- Expertise in implementing of Continuous Integration, Continuous Delivery, Continuous Deployment.
- Written Jenkins file for Build pipeline and Release pipeline
- Worked with Docker file for creating containers and Deployment of Container
- Worked with configuration Management tool like Ansible.
- Strong in maintenance of source code Repository using Git, Branching, Tagging and Merging.
- Expertise in writing playbook for configuration management tool like Ansible.
- Worked with GitHub as source code management tool for maintaining.
- Worked in Automation Build Tools and creating packages like WAR, EAR, and JAR.
- Extensive Knowledge in installation and configuration Tomcat server.
- Implemented Docker based Continuous Integration and Deployment framework.
- AWS Cloud platform and its features which includes EC2, VPC, ECS, S3, ELB, AMI, SNS , Auto Scaling , Route53 , Cloud Watch.
- Knowledge with Orchestration tool like Kubernetes.

TOOLS USED

- Source code management tool :Git , Azure repo,
 - Test Management Tool :Azure Board
 - Operating System: Linux
 - Continuous Integration Tool : Jenkins
 - Build Management : Maven
 - IDE : Visual Studio,
 - Scripting :shell, Linux
 - Configuration Management: Ansible
 - Orchestration tool :Kubernetes
 - OS-Level Virtualization : Docker
-

TRANING

Six Months (6) Traning in AWS , Linux And DevOps.

BESENT TECHNOLOGIES

EDUCATION

B.Tech (CSE) From Punjab Technical University (PTU)	-- 2022
12 th From Lord Mahavir Jain Public School	-- 2018
10 th From Lala Deep Chand Jain Public School	-- 2016

PROJECT:

Project Name: Ignitor Webapp

Types of Application: Java

Tools Used : Git , Maven, Jenkins, Docker.

Responsibilities

- Worked in maintaining Pods using Kubernetes.
- Worked on CI/CD pipeline for Deployment.
- Worked on Build and Release pipeline.
- Creating and launching EC2 instances using AMI's of Linux, windows and Ubuntu.
- Experience in creating multiple VPC's and public, private subnets as per requirement.
- Created and configure Elastic Load balancer and Auto scaling Group to distribute the traffic and to have cost efficient, fault tolerant and highly available environment.
- Hands on Experience for creating IAM roles, users, group and implemented MFA to provide additional security for AWS Accounts and its resources.
- Experience In creating S3 bucket in the AWS Environment to store files and configure S3 to host static web content.
- Experience with AWS services like IAM, EC2, S3, VPC, Auto scaling, EBS, ELB.
- Creating alarms in Cloud Watch service for monitoring the servers performance, CPU Utilization, disk usage etc.
- Working knowledge on Linux Server.
- Responsible for Monitoring CPU, Memory, Swap and Disk utilization.
- Installation and up gradation of packages using RPM and YUM.
