Expert

A creative Backend Developer offering 3 years of experience with a strong track record of designing, implementing, and maintaining high-performance, scalable applications. Proficient in Java, Spring Boot framework, and database management, with a proven ability to solve complex technical challenges. Skilled in optimizing code and ensuring system reliability. Adept at collaborating with cross-functional teams to deliver robust, efficient solutions. Proven history of delivering projects on time using Agile Methodology with a good understanding of Project Life Cycles.

Experience

Wipro 2022-04-25 -
Project Engineer
https://www.wipro.com/

- 1. Transformed Gemini System by successfully transitioning all existing functionality and code from Struts Framework to modern Java microservices using Rest API and SpringBoot. Achieved a 50% increase in system performance and enhanced development efficiency.
- 2. Delivered new and existing functional requirements, and new non-functional requirements by implementing Azure cloud infrastructure components.
- 3. Redesigned the Gemini UI screens using Angular and TypeScript.
- 4. Documented and designed Business Documents as per existing and new Screens and User Requirements for different Business use cases.
- 5. Performed Unit and Functional testing using Junit to reduce ST and UAT defects by 40%.
- 6. Analysed Code for existing and new enhancements based on User Requirements.

Nokia 2019-08-07 - 2020-07-07
Student Trainee
https://www.nokia.com/

- 1. Participated in the Mobile Networks R&D Department as part of LTE and 5G services.
- 2. Fixed several bugs for 5G and 4G code for IXIA and SPIRENT on Jira using Python and C++.
- 3. Successfully delivered support for the Automation of the DSS feature for a Simulator.
- 4. Worked on Firefall as part of adding and testing new functionality on 5G for NF tables.
- 5. Used Python, C++, Robot Framework, Jira, and Jenkins as skillsets.
- 6. Using Bash Script reduced 5G Board up time by 50%.

Education

Chandigarh University 2016-08-12 - 2020-06-26
Information Technology B.E.
7.88

B.N.S.D.S.N. Inter College -
Science Senior Secondary
93.2

Projects

Yatra Travel 2018-08-20 - 2018-09-20
Android App

- 1. Android Application is used to give information about different places in India.
 - 2. The user can navigate and find nearby landmark places and restaurants.
 - 3. Used Java and XML in building application.
- Java, XML
