Profile

Experienced Java Developer with 3.2 years of expertise in designing, implementing, and maintaining Java applications. Proficient in Java/J2EE, Spring Boot, Hibernate, microservices, creating RESTful services, and JWT authentication. Skilled in cross-functional collaboration, delivering projects on time. Deep understanding of object-oriented programming. Dedicated to staying updated with industry trends and ensuring top-notch code quality and performance.

Experience

JAVA DEVELOPER | Web4Business solution It Pvt. Ltd.| 3.2 YEARS

- Developed, implemented, and maintained Java J2EE applications, showcasing expertise Spring Boot, Hibernate, Micro Services, and JWT authentication.
- Collaborated seamlessly with cross-functional teams, ensuring the timely delivery of software projects while adhering to project scopes and quality standards.
- Utilized Spring Boot and Hibernate to design and optimize robust and scalable solutions.
- Implemented JWT authentication for enhanced security and authorization.
- Demonstrated adept problem-solving skills and adherence to industry best practices.

Skills & Abilities

- Java/J2EE Development
- Java 8 Features
- Postman
- API Gateway
- Eureka server
- Collection Framework
- Servlet
- SMS Sending and Verification
- Payment Gateway
- Feign Client
- Fault Tolerance
- Resilience4j (RETRY)
- JMeter
- Spring Boot
- Hibernate JPA
- RESTful Service
- API (Application Programming Interface)
- Microservices
- Git & GitHub
- JWT Token
- Spring Security
- Email Integration
- Concurrent Collection
- Config Server
- Rate Limiter
- OKTA

Education

Bachelor Of Technology FROM Vikrant Group of Institute Technology and Management Gwalior

Project

CAB BOOKING APPLICATION | BACKEND DEVELOPER

Project Description: The Cab Booking Application is a comprehensive system designed to facilitate efficient and secure cab bookings. As a backend developer on this project, your primary responsibility is to design, develop, and maintain the server-side components that power this application. This involves handling core data management, business logic, and APIs that enable users to book cabs seamlessly.

Roles & Responsibilities:

- Developed and maintained Spring Boot applications for a Cab Booking application, encompassing modules such as Cab Search Service, Booking Service, Payment Service, Ride Confirmation, and Customer Support and Assistance Service.
- Implemented data persistence using Hibernate JPA within modules like Booking Service, Payment Service, and Cab Search Service, ensuring efficient and structured database operations.
- Designed RESTful web services across modules, utilizing JWT token authentication for secure communication.
- Utilized Postman to comprehensively test API endpoints within Booking Service, Payment Service, Customer Support and Assistance Service, and Cab Search Service, facilitating troubleshooting and refinement.
- Spearheaded the implementation of the Model-View-Controller architecture, ensuring a clear separation of concerns throughout all modules.
- Implemented Controller, Service, and Repository layers within Booking Service, Payment Service, Customer Support and Assistance Service, and Cab Search Service, facilitating effective request handling, precise business logic implementation, and seamless database interaction.
- Integrated the Model Mapper library into modules like Booking Service and Customer Support Service to streamline complex data model mapping.
- Strategically designed and implemented robust exception handling mechanisms across Booking Service, Payment Service, and Cab Search Service, delivering user-friendly error messages and proactive issue resolution.
- Designed, implemented, and employed Data Transfer Objects (DTOs) to ensure structured data exchange between different modules.
- Managed JSON data effectively to facilitate seamless communication between clients and servers across all modules.
- Skillfully managed project dependencies and facilitated builds using Maven for streamlined development within each module.
- Successfully integrated payment gateways, Email Service, and SMS services within Booking Service, Cab Search Service, and Customer Support Service, enhancing transactional efficiency and communication.
