Data Scientist with 3 years of experience executing data-driven solutions to increase efficiency, accuracy, and utility of internal data processing. Experienced at creating data regression models, using predictive data modeling, and analyzing data mining algorithms to deliver insights and implement action-oriented solutions to complex business problems.

Experience

FEB '23 - SEP '23

Customer Service Insight Analyst | Etraveli Group, Mumbai, Maharashtra

- Building and Maintaining Predictive ML models for CSAT
- Work with large data sets to extract insights, optimize performance, and identify opportunities for growth
- Identify, build, report and analyze drivers of Operational Key Performance Indicators.
- Continuously undertake deep-dives into key metrics and provide actionable recommendations around customer experience
- Ad-hoc reporting and analysis to support key strategic initiatives
- Identify opportunities to improve operational performance as well as processes
- Provide actionable data-driven recommendations to stakeholders business questions.

FEB '21 - JAN '23

Data Scientist | Tenet Technology, Bengaluru, Karnataka

- Data processing, cleaning and validating the integrity of data to be used for analytics
- Perform initial investigation and exploratory data analysis
- Analyzing large amount of data to find patterns and solution
- Build predictive machine learning models using algorithms like regression, tree based, boosting etc.
- Develop econometric and statistical models for various problems including projections, classification, clustering, pattern analysis, sampling, simulations, and so forth.
- Propose solutions and strategies to tackle complex business problems
- Deploying end to end ML Models in production environments

Education

OCT '17

Masters In Engineering

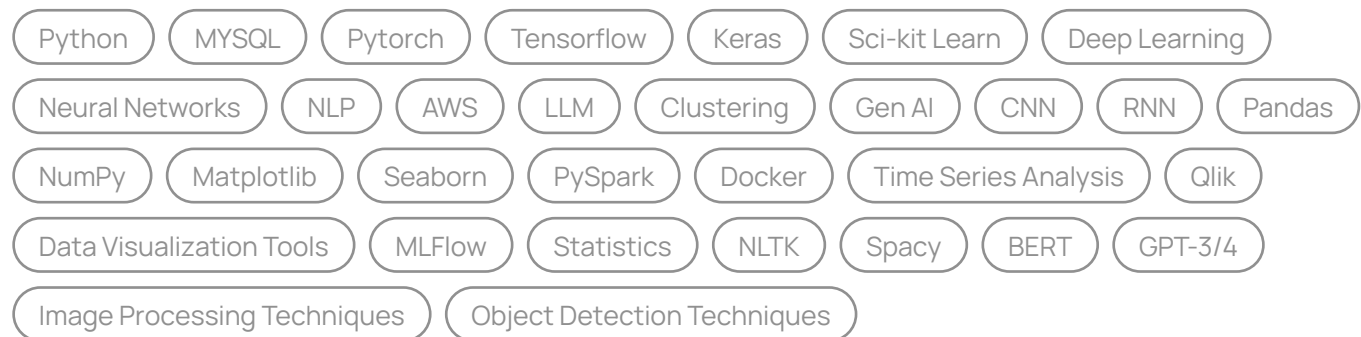

Savitribai Phule Pune University

AUG '15

Bachelors in Engineering

Shivaji University ,Kolhapur

Skills

Additional Information

Projects

1. Title: Customer Analysis using data science for online retail sector
2. Title: Sales and Demand Forecasting based on KPIs of Advertisement
3. Title : Prediction of clay soil expansion using Machine Learning Algorithm
4. Title: Predictive model for CSAT Survey
