

Akshay Chandrakant Bhoyar

DEVOPS ENGINEER

✉ bhoyar.akshay160@gmail.com ☎ +91 9834316609 🌐 [linkedin](#)

To work with my best abilities and skills in order to benefit my organisation also to be better other in this competitive time and influential position in the organisation

Skills

AWS

EC2, VPC, S3, IAM, SES, SNS, Cloud Watch, EB, EFS, SQS, Elastic Load Balancer, Auto Scaling, RDS, Dynamo DB, Cloud Trail, Cloud Front, Route53.

Linux

User administration, Enhanced user security with Sudo privileges, processes, file system LVM - LVM filesystem end to end, extend LVM file system, reduce LVM file system, DATA recovery, online LVM migration, use Firewall for controlling traffic, use ACL to give permission to any worker.

Experience

- **Radicals software, Aundh, Pune** 2019 - Present

Cloud Architect with 1 year and DevOps engineer with 2.5+ year of experience.

- Environment: AWS Cloud Technology: VPC, EC2, Auto-scaling, ELB, SNS, RDS, EBS, S3, Route53, IAM, Cloud Watch, Cloud Formation, Cloud Trail, Cloudfront, VPN, Site-to-site+VPN, VPC-Endpoint, VPC peering, IAM Role Solve onsite client issues.
- Experience in creating, planning and deploying releases in the production environment.
- Experience in developing CI/CD pipelines in Jenkins.
- Knowledge of Infrastructure Provisioning tools like Terraform
- Good understanding of Automation tools like Ansible
- Experience in migration On-Premises to AWS Cloud.
- Proficiently worked on writing Terraform modules and Cloud Formation templates to build the AWS resource with the paradigm of Infrastructure as a Code.
- Troubleshoot and Identify performance, connectivity and other issues for the applications hosted in the AWS cloud platform.
- Hands-on experience in Container tools like Docker.
- Experience in Docker file, creating images from Docker file, and hence into the container.
- Experience in Orchestration tool Kubernetes.
- Expertise in creating Manifest files for creating Pods, Service, Replication, and Deployment.

Education

- **Bapurao deshmukh collage of engineering sevagram** 2019
 - Bachelor of Mechanical Engineering
- **Laxminarayan agrawal memorial institute of technology, Dhamangaon**
 - Diploma in Mechanical Engineering

Experience Profile

● Radicals software, Aundh, Pune

Nov 2020 - Present

Client- Ebates.com

★ Project: Ebates online shopping portal

Role: DevOps Engineer

- Porting the client's infrastructure to AWS using various services like VPC, EC2, Autoscaling,
- ELB, SNS, RDS, EBS, S3, Route53, Cloud Watch, Cloud Formation, Auto Scaling, SNS, Cloud Trail, IAM AWS Setup
- Managed container-based deployments using Docker, Docker images, Docker hub and Docker
- Provided complete infrastructure solutions to clients including an end to end configuration.
- Used Ansible Playbooks to set up Continuous Delivery Pipeline.
- Managed container-based deployments using Docker, docker images, docker hub and Docker registries.
- Automated provisioning and repetitive tasks using Terraform, Docker container.
- Experienced in building microservices and deploying them into the Kubernetes cluster using AWS EKS.
- Deployed elastic load balancer. registries.
- Designed the architecture and created the cloud formation template to facilitate deployment.
- Provisioning AWS infrastructure with various services available by writing Infrastructure as a code (IaC) in Terraform, AWS resource management, AWS Cloud Formation. Created reusable Terraform modules AWS cloud.
- Deployed, managed and maintained scalable & highly available systems on AWS Setup a VPC environment.
- User authentication access.
- Strong Linux experience with familiarity with windows environments.

Client- Sainsbury

★ Domain- Retail

Role- DevOps Engineer

- Deployment of new codes on the various environments manually as well as through automation.
- Good experience in designing, cost-efficient fault-tolerant, scalable solutions and distributed systems in AWS.
- Environment provisioning through Automation.
- Using AWS cloud services such as EC2, auto-scaling and VPC to build secure, highly scalable and flexible systems that handle expected and unexpected load bursts.
- Maintaining the user accounts IAM, RDS, VPC and SNS services in the AWS cloud.
- Created S3 buckets in the AWS environment to store files.
- Implemented DNS service through Route 53 to have highly available & scalable applications.
- Maintained the monitoring and alerting of production and corporate servers using the Cloud Watch service. Created different Cloud Watch rule event alerts based on certain conditions.
- Implemented Continuous Integration using Jenkins and GIT from scratch.
- Migration of the on-premise solutions to Amazon Cloud using EC2, VPC and S3
- Utilized CloudWatch to monitor resources such as EC2, CPU memory, Amazon RDS DB services, DynamoDB tables and EBS volumes; to set alarms for notification or automated actions, and to monitor logs for a better understanding and operation of the system.
- Managing Continuous Integration and Continuous Delivery (CI/CD) using Jenkins.
- Hands-on experience in set-up monitoring in all environments.
- Attending Daily standup meetings or Squad meetings with the Client.
- Troubleshooting Application-level issues.
- Good experience of set up Jenkins and troubleshooting Jenkins issues.

★ Linux Admin Experience

- User Administration
- Managing file systems
- Monitor system performance & Linux 5, 6,7 installation
- Setup security policies for users
- User management, Creating and managing user account, groups and access levels.
- Troubleshooting any reported problems & Handling issues related to memory, swap, huge pages, overcommitting memory, Out of memory.
- Scheduling and troubleshooting various jobs through Crontab.
- Configuration and Management of YUM Servers & Installing and configuring new software.
- LVM on Red hat Enterprise Linux.
- Installation of RPM packages as and when required in Linux Servers & Applying operating system updates, patches, and configuration changes.
- Adding, removing or modifying user account information, resetting access and permissions.
- Experience in implementing automation using Configuration Management tools like Ansible.

● Radicals software, Aundh, Pune

Jan 2019 - 2020

Project: Purchasing

★ **Role: Cloud Architect**

Domain: E-commerce

- Porting the clients infrastructure to AWS using various services like VPC, EC2, Auto scaling, ELB, SNS, Security , AWS Services EC2, RDS, EBS, S3, Amazon VPC, Route53, ELB, Cloud Watch, Cloud Formation, Auto Scaling, SNS, Cloud Trail, IAM AWS Setup & Architecture
- Responsible for planning, managing, and supporting AWS infrastructure and hybrid platform
- Evaluated various proposals & recommended the best technical solutions to migrate the application to AWS
- Designed the architecture and created the Cloud Formation template to facilitate deployment
- Provided complete Infrastructure solution to Clients including end to end configuration
- Backup/Restoration, Administration & Recovery of Databases (Mysql, Mongo DB)
- Resolved trouble-tickets raised by users of the product/service through phone or email. Fixing support escalation issues
- Managed container-based deployments using Docker, Docker images, Docker hub and Docker registries
- Deployed, managed and maintained scalable & highly available systems on AWS Setup a VPC
- Automated provisioning and repetitive tasks using Terraform, Docker Container
- Experienced building micro-services and deploying them into Kubernetes cluster using AWS EKS
- Performed Provisioning of IAAS & PAAS VMs and Web, Worker roles on AWS and AWS Resource Manager
- Provisioning AWS infrastructure with various services available by writing Infrastructure as a code (IaC) in Terraform, AWS resource management, AWS Cloud Formation. Created reusable Terraform modules AWS cloud.
- Deployed the Elastic Load Balancer & configured HTTPS certificates
- Deployed, managed and maintained scalable & highly available systems on AWS Setup a VPC environment & designed an effective backup strategy based on client requirements
- Monitored production applications on AWS & initiated corrective actions based on customer feedback & survey
- User Authentication & Access
- Coordinated with a team of 5 Developers to initiate Advance procedures, triggers, functions, Indexes & exception handling
- Design and Implement a Scalable Authorization and Authentication System to Access
- Strong Unix/Linux experience with familiarity with Windows environments and hardening guidelines
