HSR LAYOUT BENGALORE

SKILLS

SIEM: Splunk ES, IBM Qradar

EDR: Cisco AMP

ESA: MS 365 Defender

Ticketing Tool: Snow,

Firewall: Checkpoint

Vulnerability Management: Tenable
Nessus

IPS/IDS: SNORT

WAF: CITRIX

AntiVIRUS:Trend Micro

EDUCATION

Jain Institute of Technology, (JIT)
Davangere

Bachelor of Engineering

2017-2021

CERTIFICATES

Splunk Fundamentals 1,

Foundation of Operationalising MITRE
Attack

Cisco- Introduction to Cyber Security

Qualys- EDR

PROFILE

As an enthusiastic SOC Analyst with 2+ years of practical experience, I have developed my skills in spotting and containing security problems. I'm excellent at assessing vulnerabilities, responding to incidents, and monitoring threats in real-time.

My ability to analyse security data, implement security best practices, and collaborate with cross-functional teams ensures a proactive defence posture for organisations.

SUMMARY

- Good understanding on network concepts & protocols, port numbers.
- Solid knowledge on security concepts and servers like DNS.
- Active Directory, DHCP, OSI Model, Classes of IP Address.
- Familiar on cyber kill chain frame work.
- Good knowledge on Cyber Attacks and Malwares.
- Understanding on security solutions like Firewall, IPS/IDS and end point security solutions like AV, DLP.
- Knowledge on SQL. XSS.TOP 10 OWASP,TCP& UDP.
- Solid Knowledge on SIEM components and Splunk architecture

WORK EXPERIENCE

**PROASPIRE INFOTECH PVT
Ltd.**

Security Analyst L1

- Monitoring logs and looking into suspicious activity utilizing the runbook and several Threat-Intel tools with the SIEM tool Splunk ES, IBM QRadar.
- Analyzing threats by taking the events from Firewalls, Endpoints, Servers, IDS/IPS etc. and identify a false positive and a true positive.
- Raising the tickets through SNow for validating the incidents.
- Responding to security breaches, possible weaknesses, and alerts from detection systems.
- Managing 24X7 SOC operations, which include detecting, following up on, and analyzing incidents.
- Creating daily, weekly, and monthly reports; properly formatting them; sharing them with clients; and notifying them when logs are stopped.
- Creating use cases, fine tuning of alerts, SOP updation.
- Reporting malware, and providing threat advisories of malware and patch.
- Producing security incident reports and briefings to the team lead and manager.
- Good understanding of Mitre Framework and Cyber Kill Chain Process.
- Good knowledge of network protocols TCP/IP and ports.
- Finetune of existing use case of SIEM to reduce false positives.
- Good understanding of vulnerability management using Tenable Nessus.
- Daily Shift Handovers.
