

Anand C
Software Development Analyst
E-mail: anand9c606@gmail.com
Mob No: 9606283414

PROFESSIONAL EXPERIENCE:

- Having 2 years of experience in the IT industry
 - Overall, 2 years of experience in Software analysis and development for Web based applications using Java, Rest API, Spring boot and BMC Remedy, Incident Management, Change Management MQ Explorer, ITSM modules.
 - Flexible to adapt changing priorities and meet deadlines as per the schedule and solve the client / customer related technical issues.
 - Experience in application analysis, development, design, requirements gathering and documentation.
 - Ability to grasp new technologies and work with confidence to complete the assigned job.
 - POC for Team Learning & Development activities and Team interactive sessions.
- Excellent problem-solving skills with good interpersonal and communication skills.

PROFESSIONAL SUMMARY:

Working as a **Software Engineer** in **NTT Data, Bangalore** from **oct 2021** to November 2023.

EDUCATION:

B.SC (Electronics) SKU in Anantapur

Application Express:

- WinSCP
- Putty
- JIRA
- Eclipse
- BMC REMEDY tool
- MQ Explorer
- Putty

PROJECTS

Project (oct 2021–nov2023)	IVS-R (BMW)
Team size	12
Role	Developer

Technologies/Tools	Spring Boot, Rest API , WinSCP, Putty, JIRA, Eclipse and analysis performed on the assigned Java application.
---------------------------	--

Project Description:

IVS-R is database-based web application designed using spring framework. It's an international standard Online-Ordering System with the ability to clientele processing. IVS-R implements the demands of the overseas markets as well as the target processes defined by the project KOVP. It also includes the offline ordering markets. IVS-R is a java application we will maintain the application.

Whenever the user gets an error during the production process whether it is an order entry, order modification, order transfer we will go through the code and check why it is failing for the user by debugging the code using the error logs which we can get through WINSCP. IVS-R will receive the data and will send the data in the form of MQ'S as messaging service.

If any queue is stuck with faulty message, we remove the message temporarily from the queue and take the error logs and fix it as quickly as possible.

Roles and Responsibilities:

- Managed all Production Issues with assigned applications (IVS-R, COP, IVS-44, DVP, DOP) running on Oracle, SQL 2008 R2,
- Supported applications, revising, updating, creating, and improving stored procedures, problem solving and providing documentation as required, including root cause analysis.
- Installed, Deployed, and supported IVS-R project using J2EE, Spring, Apache.
- Implementation of new software, patching servers, troubleshooting, light project planning.
- Performed Incident/Change Management functions via BMC REMEDY tool. Identified required changes and updates, generated and controlled change management documentation and managed execution.
- Coordinated development team with business users for system deployment and modifications.
- Created and maintained project documentation and operational manual of the application.

Thanks
Anand C
