

Summary

I graduated in Mechanical Engineering from VTU Karnataka with distinction, and then worked with BEML Ltd., Mysore (Mechanical industry) for about 1-year in various functions (production, quality engineering etc.) At this stage, I decided to join my family firm Vishal Areca Traders (Areca Trading Business). Working closely with my father (Managing Director), helped in expanding the portfolio of product offerings (including spices such as cardamom, pepper and nutmeg), ensured better branding through superior packaging, grading etc. and streamlining financials. Sometime during the Oct/Nov 2022 timeframe, the situation triggered a thought to consider a career in the software industry. Then, I decided to quit my family business and take a plunge into the Software industry (DevOps role to be more specific) in Nov-2022. Since then, I have completed 4-months training in DevOps (Dec-2022 to Mar-2023), and now looking for an exciting career in DevOps area.

Skill Summary

- DevOps :
 - Operating System : LINUX and Windows
 - Version Control System : GIT
 - Build Tool : Maven
 - CI/CD Tool : Jenkins
 - Configuration Management Tool : Ansible
 - Containerization Tools : Docker, Docker Swarm, Kubernetes
 - Logging and Monitoring Tools : Elastic search, Grafana and Cloud watch
 - Cloud Technologies : AWS
 - Messaging Services : Amazon SNS
- Mechanical Engineering:
 - Auto CAD
 - CATIA

Academic Details

- B.E (Mech.) from Visvesvaraya Technological University (VTU) in June- 2018 with distinction (74.4%).
- PUC from Pre-University Education Board Karnataka in April- 2014 with distinction (83.83%).
- SSLC from SSLC Board Karnataka in May- 2012 (85.76%)

Short-term Courses Completed

- AWS/DevOps Course: This is a 4-months online program delivered by industry veteran covering main modules such as “DevOps life cycle”, “Load balancers”, Elastic Kubernetes Service”, “VPC”, “Lambda”, “Version Control Systems”, etc.
- I finished my AWS training and started getting ready for the AWS Certified Cloud Practitioner exam.

Professional Experience

BEML Ltd. Mysuru Sept-19 to Nov-20 Graduate Apprentice Trainee

- During the 1 year training period, I got trained in quality/inspection, and production departments of BEML (Earth mover Equipment division), and also got to work on various functions.
- As part of the inspection team, I inspected vehicles like Dumpers, Motor Graders and Water Sprinklers for about 6 months. During this period, our team inspected about 2-3 vehicles per day. My work-scope included inspection of parts such as hoses, steering wheel, tyres, cylinders, checking for any leakages etc..
- Worked in the production department for 6 months. During this period, my duty was to explain the design details of assembly employees, look after the design of the vehicle and guide the employees to assemble the parts as per given in the design. Additionally responsible for smooth availability of some parts in case of any shortage etc.

Vishal Areca Traders Dec-20 to Nov-22 Manager

- Vishal Areca Traders was founded by my father about 28 years back, and then the objective was to be a successful small business (little more than a pan-beeda shop). Since then, this humble firm has grown as a multi-location super-speciality areca and spices trading house (both retail, and wholesale).
- My education and exposure to the world helped to streamline operations, improve branding, and better both topline and the profit margin. Exposure to the latest technologies was crucial in improving cash-flow, better branding, and expanding the portfolio of our offerings. Introduced better technology/machine to cut areca-nuts that is faster, reduced wastage. Also improved our product packing, and financial management using appropriate software applications.

Academic Project Details

- B.E. Final semester project: We built a Four-wheel steering system with automatic rotation of headlights proto-type. Four of us worked on this project full-time for 4 months during our final semester. We designed this system using CATIA, and procured components (wheels, headlights, steering rod, etc).

Achievements

- Bagged 1st prize in volleyball in college annual sports.
- Awarded 2nd prize in district level shuttle badminton.

Extracurricular activities

- Actively participated in team events and was a part of the sports organizing committee.
- Participated in inter-zonal volleyball competition in college held at BMSIT Bengaluru and at SDMCET Ujire.
