

Devops/Cloud Engineer

AnilKumar

Mob: +91-9912764539

Mail: busipatianil@gmail.com

Profile

- Having **4+ years** of IT experience in Build and **Release/DevOps Engineering** in automating, building, deploying, and releasing of code from one environment to another environment.
- Worked with Engineers, **QA and other teams** to ensure automated test efforts are tightly integrated with the build system and in fixing the error while doing the deployment and building (Agile Projects).
- Experience working on several Docker components like Docker Engine, Hub, Machine, **creating Docker images, Compose, Docker Registry and handling** multiple images primarily for middleware installations and domain configurations.
- Experience in Implementing Continuous Delivery pipeline with Docker, Maven, Jenkins and AWS.
- Creating CI/CD DevOps Build and Deployment Automation – using GIT, GitHub, Maven, Nexus, SonarQube, and Jenkins Pipeline in AWS Cloud environment.
- Worked on creating new infrastructure on AWS including instance creation to deploying environment.
- Having good working experience on LINUX and Windows platform.
- Having good experience on **SonarQube and Nexus** creating Repositories and uploading files and administration.
- Having good experience on SonarQube creating projects, Quality gate and administration. Working with Development and Testing team to establish a build schedule, execute the builds, Writing Scripts for Automation and troubleshoot build failures.
- Having good knowledge on Docker Containerization and Docker files.
- Experience in configuring and updating the servers using configuration management tool Ansible and Writing Playbooks and Roles.
- Basic Knowledge on Kubernetes and Orchestration and Cluster's. Developing Yaml files based on requirement.
- Having good experience in **Terraform** and provisioning with Cloud for infrastructure. Customer focused, organized, detail oriented with the ability to meet deadlines.
- Managing the services within **AWS** and global IT infrastructure.
- Managing CloudWatch for monitor critical system health, performance, security.

Skills

- Operating System: Red Hat Linux, Windows
- Version & Build Tool: Git, Maven
- Cloud Platforms: AWS
- Databases: MySQL, Ibmdb2
- CI-CD & Application Server: Jenkins, Tomcat 9
- Code Quality Tool & Artifactory Repo: SonarQube & Nexus
- Monitoring: Nagios, CloudWatch
- Containerization & Orchestration: Docker, Kubernetes
- IAAS: Terraform
- Scripting Languages: Shell Script

Education

- Bachelor of technology in Electronics, NIST, Rajampeta, Andhra Pradesh, JNTU-A university with 63% - Aug 2014 – Mar 2017
- Diploma in Electronics, Loyola college, Andhra Pradesh, State Board of Technical Education with 72% - Aug 2010 – Dec 2013
- SSC (x), Nalanda High school, Rajampeta, Andhra Pradesh, State secondary Education with 69% - Jun 2009- May 2010.

Work Experience

Project 1:

Organization: DXC Technology India Private Limited

Mar 2022 - Dec 2022

Client: Lincoln National Corporation

Role: Professional-1 Application Delivery (Devops)

As part of the Environment Prevention DevOps team, my role and responsibilities are as follows:

- Maintaining the source code in GIT for various applications & Responsible for creating the branches and tagging the code.
- Monitor and fix the space & memory issues in all Non-prod/Prod servers.
- Create users, groups and manage access controls in RHEL & window Machines.
- Deploying the WAR files in Tomcat Server.
- Troubleshoot Deployment issues in the Dev, QA and UAT environments
- Creating database using IBMDB2 and providing user access, Syncing the databases and taking the backup & restoring & troubleshooting the database issues.
- Monitor builds and provide proactive support to resolve any build issues.
- Good interaction with developers, Database teams to coordinate job tasks and strong commitment to work effectively in agile/scrum environment.

Project 2:

Organization: GLOBE ACTIVE TECHNOLOGIES LIMITED

Aug 2018 - Feb 2022

Client: CenturyLink

Role: Software Associate

Performed various development activities for DevOps practices for the project, including continuous integration, continuous delivery, continuous testing, and continuous monitoring

Roles and Responsibilities are as follows:

- Setting up the new build environment for various applications in **Windows/Linux** environment.
- Creating and building Docker images, containers and writing docker file to create custom images and issue troubleshooting and Implemented Microservices using Docker.
- Resolving issues and continuous improvement of Docker environment both on dev, QA, pre-production and Production Environment.
- Implemented Master–Slave concept in Jenkins to achieve Load Balancing.
- Implementation of Jenkins pipeline job configurations and access permissions for various groups and issue troubleshooting for pipeline jobs.
- Creating and maintaining the source code and release branches on GIT for various applications & Responsible for creating branches, merging and resolving merging conflicts.
- Creating War/Ear files using Maven.
- Implemented continuous integration using **Jenkins & Scripting experience in Groovy for automation purpose.**
- Installed number of plugins in Jenkins for project requirement.
- Automation of build process (Build Automation) using the Jenkins, **Maven** and **Git**. Involved in installing the **plugins** and setting of the **jobs/nodes** and configure the jobs for automate the deployment process.
- Involved in automate the deployment of the artifacts in the Artifactory repository **NEXUS**.
- Involved in providing automatic alerting and reporting on code quality and code coverage using **SonarQube**.
- Involved in deployment of war files in Tomcat application servers.
- Involved in automate the application deployment in the cloud using Docker technology with Elastic Container Service (ECS).
