Test Lead and Application Development

Introduction

- > Completed BE in Electronics and communications passed out in year 2000.
- > With a 10 years of experience; was last associated with Tata Elxsi Ltd., Bangalore.
- > Expertise in Manual Testing & Mobile Application Testing; Have been managing, training and leading software testing projects on various applications.
- > Specializes in Mobile Application Testing and Protocol Testing.
- > Having strong experience in Sanity testing, Feature testing, Functional testing, System testing, Compatibility testing, Retesting, Regression Testing, Performance testing, Load testing and stress testing in mobile handsets and web based applications.
- > Well versed with QA Methodologies, Software Testing Life Cycle (STLC), Defect Management Life Cycle (DMLC), Testing Methodologies, Testing Techniques and Software Development Life Cycle (SDLC).
- > Good knowledge of C language, UNIX commands.
- > Strong collaboration, team building, interpersonal, communication skills with proficiency at grasping new technical concepts quickly & utilizing the same in a productive manner.

Professional Abilities

- > Experience across multiple types of testing i.e. user acceptance, system integration.
- > Experience of working on Business, Technical and Functional Requirements.
- > Able to take preventative action when any risks become unacceptable.
- > Understanding of different test approaches and techniques.
- > Actively maintain awareness and understanding of current developments and best practice in testing.
- > Knowledge of execution, scripting and planning.
- > Making sure that all testing plans comply with company guidelines, standards and regulations.

IT Skills

Operating Systems WINDOWS 9x, LINUX and DOS

Languages C, JavaScript, SQL,ETL,HTML,CSS, Java

Tools GDB, Wellphone, MSU, Klif, Dbgprs, EMP download, NowSMS, Hyper Access, Bugzilla, QC, QTP, Selenium

Domain Specific Systems Unit Group

Training C and UNIX - UTTARA

Career Sketch

April 2022 – Till now – Attica Gold Pvt Ltd as a Virtual Manager

NOV 2021 – March 2022 - VCARE Online Learning APP – Content Writer

Jan 2021 – Nov 2021- Zavetech business solutions Pvt Ltd – Content Writer

Feb2020- Dec 2020 Raman Polytechnic (handled Physics and Maths for high school both ICSE and STATE)

October 2019-January2020- Panchasheela Polytechnic as a HOD

October 2018 -september2019 Access6 Technologies PVT Ltd

July'15 – September 2018 M.S. Ramaiah polytechnic, Bangalore Lecturer

May'15-June'15 Vaps TechnoSoft PVT Ltd CCD-Team Lead

July'13 - April'15 M.S. Ramaiah polytechnic, Bangalore Lecturer

Feb'05 - Dec'12 Tata Elxsi Ltd., Bangalore

Feb'05 - Apr'08 Software Engineer
May'08 - Dec'12 Sr. Engineer

Aug'03 - Jan'05 SCT polytechnic, Bangalore Lecturer

Aug'01 - Aug'03 Pacetelesoft Pvt. Ltd., Bangalore Software Engineer

Key Areas Delivered

FUNCTIONAL

Application Development

- > Participating in Software Applications; mapping requirements; participating in the finalization of product specifications and selection of techniques.
- > Supervising smooth implementation of the project and extending post-implementation, application maintenance and technical support.

Software Testing

- > Managing the Software Testing activities and developing test plans and test strategy. Preparing test status report and test effort estimation.
- > Handling black box testing. Executing regression test, functionality test, validation check, user acceptance test and performance test.
- > Reviewing system test cases, SRS documents and supporting test process implementation. Ensuring Test Readiness, carrying out final verification of application and performing bug trend analysis.

Quality Assurance

- > Providing scope, resource and time estimates for projects presented to QA for testing and analysis.
- > Designing & coordinating implementation and availability of QA test environments. Ensuring compatibility of testing with the product specifications.
- > Providing QA test status and progress reports as appropriate to top management. Working with various Managers to ensure traceability from requirements gathering to QA Test Cases.

Educational

2000 B.E.(E &C) VEC, Bellary 74.3%
1996 P.U.C S. V. C. P. U. College Vyasanakere 74%
1994 10th S. V. C. P. U. College Vyasanakere 82.47%

Personal Dossier

- > Date of Birth : 16th July 1978
- > Language Known : Hindi, English and Kannada

Project Annexure

Tata Elxsi Ltd.

Project Name Intelligent system benchmarking application

Team Size 5 Duration: 14 months

Client Intel, Bangalore

Operating System Windows7, Linux

Project Description ISBA simulates a digital signage application, Medical feature, Streaming feature, Adobe feature along with providing benchmarking results. It is targeted to run on selected hardware platforms, and operating systems. The idea behind developing ISBA is to identify right hardware platform to run ISBA applications. ISBA supports

- . Multiple Zones
- . Multiple Display Units of different make and model
- . Multiple Orientation (Landscape and Portrait)
- . Multiple Content - Video, Audio, Images, Widgets, RSS and Text Tickers, Streaming-Video.

Role Involved in Testing-Writing and executing test cases and defects management

Project Name Panasonic eBook reader

Team Size 2 Duration: 1.5 months

Client Panasonic, Bangalore

Operating System Windows XP

Project Description The objective of this project is to prototype eBook Reader and Organizer on the Freescale's i.mx51 board. The prototype will allow the user to read EPUB books, make and organize notes.

The prototype will be touch screen based, development will be on Android version 2.1. The scope of the project includes generate concept with full set of features.

Role Involved in Testing-Writing and executing test cases and defects management

Project Name Binatone iHome Phone

Team Size 3 Duration: 12 months

Client Binatone, Bangalore

Operating System IOS, Android, Blackberry

Project Description The iHomePhone is intended for home and office telephone, intercom service with Internet access. The device allows DECT telephony, photos, music and Internet services to be combined as a compelling consumer device for the home. iHome Phone also provides multimedia capabilities such as photo viewer, audio player and other Internet capabilities such as web browsing and Widgets.

Role Involved in Testing-Writing and executing test cases and defects management

Project Name Touch screen application

Team Size 6 Duration: 9 months

Client MEDION, Bangalore

Operating System Windows7, WindowsVista

Project Description The Touch screen application is launched using the shortcut on Windows desktop or using a hardware button. The unique touch screen based application suite support desktop customization and gives access to applications in application suite. Applications are:

- . Home Application
- . Notes Application
- . Picture Viewer Application
- . Media Player Application
- . Speech Recognition Application

The Home application is the container application for the application suite. The shortcuts are arranged in certain areas using drag and drop and applications can be launched by double tapping. Shortcuts in Home screen can be made scattered using drag and drop. The shortcuts will be dragged and dropped to the recycle bin.

Role Involved in Testing-Writing and executing test cases and defects management

Project Name Android

Team Size 10 Duration: 17 months

Operating System Android

Project Description The Android platform is a software stack for mobile devices including an operating system, middleware and key applications. Developers can create applications for the platform using the Android SDK. Applications are written using the Java programming language and run on Dalvik, a custom virtual machine designed for embedded use, which runs on top of a Linux kernel. Eclipse is an IDE used for development of Android applications. It comes with features like debugging, documentation inbuilt for Android, complete help provided, running Android applications, starting emulator etc. Applications in the project are:

- . Phonebook
- . Calendar
- . Personal digital organizer
- . Media Player
- . Stopwatch
- . Unit Converter
- . Currency Converter
- . On theft sms sender
- . Calculator

Role Involved in Testing-Writing and executing test cases and defects management

Project Name Mobile Testing

Team Size 14 **Duration:** 23 months

Client SAGEM (A major world player in mobile phones), Bangalore

Operating System Windows 2000/XP

Tools Wellphone, MSU, Klif, Dbgprs, EMP download, NowSMS, Hyper Access.

Project Description This project involves mobile handset testing

The project-involved testing of various software versions targeted to different mobile handsets.

The tests covered all the functionalities and ergonomic aspects of SMS, EMS, MMS, Calls, Settings, and WAP - based on GSM, GPRS technologies and supported Handsets. The tests were executed using the client provided test specific tools, documents, result sheets and script files.

The project involved automating of tests execution using AT Command Scripts. Features tested:

. WAP (WAP display, WAP GUI, Browser history, WAP OMA download, WAP WSP GET, WAP makecall, WAP Snapshot, WAP Bookmark, WAP Life cycle, WAP Save as, WAP SVG, WAP softkey, WAP OEM tests, WAP Multisession,) over GSM, GPRS, Messaging services (SMS, MMS, EMS), Organizer, ToDo, IRDA, Blue tooth, Phonebook, Multimedia objects, Phone Settings, Calls, Idle, Amplified Mode, Response time, OEM online testing, Audio Player, Checklist Operator, Games and Java applications, Instant Messaging, Security features.

Role Involved in Testing-Writing and executing test cases and defects management as well as leadership.

Project Name PoC (Push to talk over cellular)

Team Size 8 **Duration:** 1.5 months

Operating System Linux 6.2

Project Description The PoC outlines a Push-to-talk type of service over standard mobile networks. It defines a half-duplex Voice over IP solution. PTT applications provide two-way one-to-one private calls and one-to-many group call services similar to a walkie-talkie service. PoC is implemented on the IP backbone

Role Involved in Testing-Writing and executing test cases and defects management

Project Name H.323

Team Size 5 **Duration:** 4 months

Operating System Linux 6.2

Project Description H.323 defines a number of elements that are required for multimedia transmission. Often H.323 is considered to be just the call-signaling element of a multimedia call, responsible for setting up and clearing down calls.

Role Involved in Testing-Writing and executing test cases and defects management

Pacetelesoft Pvt. Ltd., Bangalore

Project Name Session Initiation Protocol (SIP) Stack Development

Team Size 5 **Duration:** 12 months

Operating System Linux 6.2

Project Description The Session Initiation Protocol (SIP) is an IETF application-layer control (signaling) protocol for creating, modifying and terminating multimedia sessions with one or more participants. The project involves in development of SIP Stack compliant to RFC 2543 for implementing SIP based applications like SIP proxy server,

SIP redirect server, SIP user agent etc.

Role Involved in the Design and coding of the following modules.

- . Encoder Module.

- . Accessor Module

- . Memory Management Module

Involved in Unit testing

Project Name HTTP Server

Team Size 5 Duration: 5 months

Operating System Linux 6.2

Project Description The project involved in developing a server with the http stack embedded in it; for processing the request from the clients. Threads are incorporated to allow multiple clients. The software program consists of all the standard headers, requests and error fields. The software was tested in Linux platform for Netscape browser as well as Internet Explorer

Role Detail Design and implementation of Parser Module.

This module takes a character buffer from the threading part, parses the buffer, put it into the appropriate structure variables. This structure is used by the message processing module for sending the response
