📄 Profile Summary

Enthusiastic Data engineer with 1 year of experience as an intern and aspiring Data Science professional Skilled in utilizing advanced analytical models, machine learning techniques, and data visualization tools to extract valuable insights from complex datasets. Proficient in SQL, Python, and Tableau, with a passion for developing dynamic dashboards, crafting high-quality data sets, and accurately predicting outcomes. Seeking opportunities to apply my skills and knowledge, contributing to the success of an organization and quickly becoming a valuable asset.

🎓 Education

B.E (EEE)
V.R.S.C.E.T | Anna University | 2006 |
First Class with Distinction

🏢 Employment History

Data Engineer Intern
Ensurity Technologies Pvt. Ltd., Hyderabad.
Dec 2020 - Nov 2021

- Experience in Python
- Experience in ML algorithm

Software Engineer
Synoro Technology Ltd., Hyderabad
Dec 2010 - April 2012
Experience in designing, debugging Embedded software

- Experience in ARM Controllers
- Experience in writing test cases
- Experience in handling clients on sites & support

Courses & Certifications

POST GRADUATE CERTIFICATE IN SOFTWARE ENGINEERING FOR DATA SCIENCE

Great Learning | IIIT Hyderabad | August 2023

Personal Details

Date of Birth

29-December-1984

Marital Status

Married

Gender

Female

Address

**Hi-tech city, Madhapur
Hyderabad**

Languages

English - Professional working proficiency

Tamil - Native or bilingual proficiency

Hindi - Read, write and speak

Telugu - only to speak

Project

ML based Identity and Access Management - Internship project

Developed the machine learning model for the Ensurity IAM (XSense) system, ensuring that access is provided only to authorized individuals. Used machine learning algorithms to monitor user behavior and determine the specific apps and data that each user requires access to.

Keyskills and Tools covered:

Utilized Python, MySQL databases, and web development frameworks to implement the ML model.

Conducted data analysis and pre-processing to optimize the ML model's performance.

Capstone Project: Voter CRM Analytics (voterCRM)

Developed a web-based application with the following features:

- Implemented an admin login functionality, allowing authorized users to add new agents, as well as modify the credentials of existing agents.
- Created a comprehensive agent login system that enabled users to upload voter information through bulk uploads. This included designing and implementing a database for voters, covering Andhra Pradesh and Telangana regions.
- Developed functionality to retrieve all voters uploaded into the voterCRM database for a given assembly constituency.
- Implemented a user-friendly interface for updating individual voter information.
- Integrated analytics tools to provide insights through a dashboard, including sentiment analytics and cluster identification.

Tools & Skills:- Python, AI, DBMS (MySQL/ MongoDB), PySpark/ Kafka for stream processing, APIs, Docker

Declaration
