EDUCATION

ST. MARTINS ENGINEERING COLLEGE

2019-2023

Bachelor of technology in Computer Science | CGPA: 7.5

PROFILE

Data Scientist with expertise in **LLMs**, **NLP**, and advanced data science techniques, skilled at extracting actionable insights to drive data-driven decisions. Experienced in building prototypes that enhance customer engagement and business impact.

WORK EXPERIENCE

SRIKARI IMPETUS SOLUTIONS PVT.LTD.

Hyderabad

Aug 2023 – May 2024

Associate Software Engineer

- **Engineered Conversational Q/A Bot:** Fine-tuned the Mistral 7B model with QLoRA, leading end-to-end development from data preprocessing to evaluation, achieving 90% accuracy. Deployed on AWS SageMaker for scalable & efficient inference, reducing inference time by 20%
- **Designed** and implemented a Retrieval-Augmented Generation (**RAG**) system, leveraging **GROQ** foundational models to enhance information retrieval speed by 20%.
- **Developed** a sentiment analysis application using **PyTorch**, boosting user engagement by 20% through personalized experiences and decreasing prediction error rates by 30%.
- Collaborated with cross-functional teams, ensuring alignment with business goals and user needs.

PRANAVA INTEGRATED TECHNOLOGIES

Hyderabad

Feb 2023 - July 2023

Data science (Internship)

- Architected and implemented efficient data pipelines for a flight price prediction application, achieving 20% faster training times and seamless data ingestion and transformation. Demonstrated strong analytical skills and attention to detail for capturing insights.
- Utilized **EDA** to extract actionable insights, inform strategies and boost work proficiency by 25%. Empowered team members through collaboration and effective communication.

TECHNICAL SKILLS

- Data Analysis: Skilled in transforming and analysing large datasets to derive actionable insights.
- NLP: Proficient in word embeddings and text transformation techniques to optimize NLP models.
- PyTorch: Skilled in designing and optimizing custom deep learning architectures with PyTorch.
- Mathematics: Mastery of gradient descent, backpropagation, and key optimization algorithms.
- AWS & Git Actions: Adept at deploying models on AWS, leveraging Git Actions for CI/CD and scalable cloud solutions.
- LLMs & AI Agents: Proficient in fine-tuning LLMs, utilizing LangChain, and building AI agents for automation and real-time tasks.

PROJECTS

BANGALORE HOUSE PREDICTIONS

[GitHub](#)

May 2024

- Developed a predictive model for Bangalore house prices using data analysis and EDA to ensure an increase in accuracy of 11%.
- Implemented GitHub Actions and API integration for seamless web interaction with the model.

NEURAL NETWORKS (SCRATCH)

[GitHub](#)

Oct 2024

- Achieved 80% accuracy on the Titanic dataset by implementing linear regression, gradient descent, and neural networks using pure Python and NumPy, without relying on traditional frameworks.
