

GOTTAM ARCHANA

gottamarchana257@gmail.com 7670981009

Andhra Pradesh, India

Computer science major student looking to work in a dynamic organization that utilizes and enhances my skills, which offers me challenging opportunities to enhance my professional and technical knowledge.

Education:

Course	Skillset	School/College	CGPA / Percentage	Duration
B.Tech	CSE	JNTUACEA (Autonomous), Ananthapuramu.	08.95/10.00	Jan 2021 - *May 2024
XII	MPC	Narayana Junior College, Tirupati.	96.30/100.0	Jun 2018 - May 2020
X	Science	Vikas Public E. M. School, Punganur.	10.00/10.00	Jun 2017 - May 2018

Skills:

Programming Languages	:	Python, C, Java(Basics)
Databases	:	SQL
Web and Scripting Tools	:	HTML, CSS, JavaScript
Development Tools	:	Visual Studio, Android Studio, Anaconda, PyCharm
Coursework	:	Data Structures, DBMS, Web Development, Algorithm Design, Machine Learning

Experience:

Web Development Training

Internshala Trainings, 2 Months (Sep - Nov 2022)

- Developed proficiency in HTML, CSS, DBMS, JavaScript, and Node.js.
- Successfully completed final project showcasing web development skills.

Machine Learning Internship

Internship Studio, 2 Months (Jun - Jul 2022)

- Gained hands-on experience in machine learning with "YouTube Adview Prediction" project.

Projects:

Food Website Web Application

- Designed a responsive web application for a food website, ensuring optimal performance.
- The main target of this web application is to develop a user friendly online food ordering website.
- Utilized HTML, CSS, JavaScript and Node.js for seamless functionality of website which can run on multiple devices.

YouTube Adview Prediction using Machine Learning

- Built a machine learning model which predicts adviews based on video data (likes, dislikes and length of a video).
- Employed data preprocessing, training, and prediction using Python.

Admission Management using Python GUI

- Created a graphical user interface for admission management of a university, which shows the details of student and administration could manage and update the student details like adding the details of new students, etc.
- Utilized Python, tkinter, and Matplotlib for dynamic visualization.

Result Management using C Language

- Developed a C-language based project for university result management which shows the results of a student year wise and semester wise.
- Utilized basic C programming language to create a clear, concise result display.

Certifications:

Full Stack Development - Internshala Trainings

Machine Learning - Internship Studio

Internship and Job Preparation - Internshala Trainings

Web Development – Solar Secure Solutions
