

Archana Kumari

Software Test Engineer

1698, 16th Main, HBR Layout, Bangalore, 560043 | +91 9036010061 | archana.ak734@gmail.com

Objective

To provide efficient and effective efforts towards the attainment of organizational goals with exploring the wide scope of knowledge and intelligence. AnCI/Cd to work an environment that provides a challenging and rewarding career ensuring high-level job satisfaction. In the process apart from benefiting my employer, I also expect to learn for my overall development.

Professional Experience

- Motivated Software Test Engineer in with more than **3 years** of experience in **Software Testing/QA** and having good practical knowledge in the technical and conceptual areas of Software Testing (**Manual and Selenium Automation**).
- Experience in Automation testing of **Web applications** using **Selenium Web Driver with Java**.
- Having Experience in **API test automation** using **Rest Assured**.
- Experience in setting up **CI/CD pipeline** for Automation Projects using **Jenkins**
- Excellent Knowledge of the Software Development life Cycle (**SDLC**) and Software Testing life Cycle (**STLC**).
- Good Experience in working on projects in **Agile** Environment.
- Expertise in conducting and participating in different Types of Testing - **Functional, Regression, Sanity, E2E and Smoke Testing**.
- Experience in working on **Page Object Model** Design pattern with **Hybrid framework**.
- Hands on experience to create project with build tool like **Maven**.
- Strong in analyzing and understanding **Business specifications, testing requirements and Developing Test cases**.
- Writing Test cases using **Element locators, WebDriver** methods.
- Experience at bug-reporting and bug tracking / management using **JIRA**.
- Experience in **Postman API Testing** for Manual & Automation Testing.
- Worked on applications developed using **Salesforce**, Java, JavaScript.

Skills & Abilities

- | | |
|---|---------------------|
| • STLC & SDLC | • Hybrid Framework |
| • Selenium Automation Testing | • Page Object Model |
| • WebDriver methods | • Maven |
| • API testing with Rest Assured | • JIRA |
| • Smoke, Regression, Sanity, Functional Testing | • Java |
| • SQL DBMS | • Jenkins, CI/CD |
| • Github | • TestNg |

- BDD Cucumber
- Black Box Testing
- Order creation through salesforce
- Java
- SDET

Experience

SOFTWARE TEST ENGINEER | IBM | MARCH 2021-PRESENT

Project Name: FORTE

Project Type: Telecom

Organization: IBM

Testing Approach: Manual & Automation

Tools Used: Selenium, JIRA, Github, Jenkins, TestNg, Maven.

Role: Software Test Engineer

Duration: March 2021 to present

Project Description:

Lumen Technologies (formerly CenturyLink) is an American telecommunications company headquartered in Monroe, Louisiana, that offers communications, network services, security, cloud solutions, voice, and managed services. The application was a service delivery platform where we use billing, business, operations and network systems with different environments. Multiple applications used for the data flow along with different activation channels.

Responsibilities:

- Developed Automation test scripts for different test scenarios covering all aspects of project functionality using Selenium Webdriver with TestNg framework. .
- Involved in performing Sanity, GUI, Functional, System Integration Testing (SIT) and Regression Testing, End-to-End Testing.
- Participating in Scrum meetings and Understanding the Business Requirements.
- Worked in On-Demand Release and making sure product Sign-off in-time.
- In the regression phase, the project was automated using Selenium, was responsible for developing a part of dynamic framework which could automate all the test cases.
- Worked in Agile methodology (Scrum) to ensure the new features meet the customer requirements and acceptable quality assurance standards.
- Created and updated test scenarios, test plans, and test cases according to use case and design
- Participated in system walkthrough and inspection meetings to understand the business rules and system operation flows.
- Wrote SQL Query to extract data from various database tables for backend testing purpose.
- Identified and documented defects using JIRA to ensure applications functionality

- Identified and tracked defects, generated bug reports and submitted test report.
- Worked closely with users and program developers to ensure application development meets with the user expectations.
- Performing Smoke, Functional, Compatibility and User Interface testing.
- Performing Smoke testing, Retesting and Regression testing.
- Performing Functional testing, and UI testing.

Education

BACHELOR OF TECHNOLOGY | JULY 2017 | DURGAPUR ISNTITUTE OF ADVANCED TECHNOLOGY AND MANAGEMENT, DURGAPUR, WEST BENGAL

Activities and Interests

Watching Movies, travelling, hiking.
