

ARHIT CHATTERJEE

Full Stack Developer

About Me

Dedicated and highly skilled Full Stack Developer with extensive experience in Java and Angular.

Adept at designing and implementing robust and scalable web applications. Seeking a challenging position to leverage my expertise and contribute to innovative software projects.

Jangipara, Hooghly, West Bengal-712404

LANGUAGE

- English
- Hindi
- Bengali

SKILLS

- Programming Languages: Java, JavaScript, TypeScript
- Frontend Technologies: Angular (Angular 2+), HTML, CSS, Bootstrap

EXPERIENCE

Nagarro Software Private limited 2021 - ongoing

- Led the development of a customer portal using Angular 11, enabling clients to manage their accounts and access real-time data.
- Designed and implemented Java-based backend systems, optimizing data retrieval and processing.
- Implemented security measures, including authentication and authorization, to protect sensitive data.
- Collaborated with UI/UX designers to create visually appealing and responsive web interfaces.
- Ensured code quality through code reviews, unit testing, and continuous integration.
- Troubleshooted and resolved complex technical issues to improve application performance.
- Spearheaded the migration of legacy systems to a modern Angular-based frontend.
- Mentored junior developers and conducted knowledge-sharing sessions to improve team skills.

EDUCATION

Maulana Abul Kalam Azad University Of Technology

B. Tech (CSE) from Guru Nanak Institute of Technology, Kolkata(2017 - 2021).

SKILLS SUMMARY

Spring Boot	80%
Angular 11	81 %
SQL	81 %

- Backend Technologies:

Spring Framework,

Spring Boot, Hibernate

- Database Management:

MySQL, PostgreSQL,

MongoDB

- Version Control: Git

- RESTful API

Development

- JUnit, Jasmine, Karma

- Continuous Integration:

Jenkins

Java Script

81 %

MySQL

81 %

MongoDB

81 %

PROJECT SUMMARY

project 1(Aug 2022 - present):

Domain - Travel and aviation

Project Details:

- Work with multiple domains to get new requirements for new Applications and new infrastructure.
- Develop the new features in the backend using Spring Boot Microservice and Spring Boot multi-module project concept.
- Help the team to increase the code coverage and write the unit test cases and integration. test cases using Junit 5.
- Work on the new requirements and make the new modules as per the client's requirements.
- Work on critical project configurations.
- Work on the different REST APIs and MQ messages.
- Work on the deserializing of JMS messages and storing the fetch data from those in the database.
- Helped the QA team understand the scenario of the project and helped them quality check and write test cases for the stories, tasks, and bugs.
- Involve in to release and deployment of the stories.
- Also perform GIT operations like raising pull requests, watching other's pull requests, and putting comments if there are any for enhancement of the code to reduce time and space complexities, typing mistakes, corrections of wrong data types or wrong method names, etc.

project 2(Aug 2021 – Jul 2022):

Domain - E-Commerce

Project Details:

- Work with multiple domains to get new requirements for new Applications and new infrastructure.
- Developed the new features in the backend using the fluent framework in Java.
- Help the team to increase the code coverage and write the unit test cases and integration. test cases using Junit 5.
- worked on critical configurations.
- fetched Data from GraphQL, and made different GraphQL queries and mutations.
- Helped the QA team understand the scenario of the project and helped them quality check and write test cases for the stories, tasks, and bugs.
- Involve in to release and deployment of the stories.
- Also performed GIT operations like raising pull requests, watching other's pull requests, and putting comments if there are any for enhancement of the code to reduce time and space complexities, typing mistakes, corrections of wrong data types or wrong method names, etc.

project 3(Apr 2021 – Aug 2021):

Domain - E-Commerce

Project Details:

- Created REST API using Spring Boot framework.
- Created the different web pages using angular 13.
- Created the different components using Angular13.
- Created the admin and the user portal using Spring Boot Microservice and Angular 13.
- Involve in to release and deployment of the stories.

TECHNOLOGY EXPERIENCE

As Java Developer:

- Core Java concept with object-oriented programming language.
- Core Java advanced concepts like Exception handling, creating custom exceptions, List Interface, Enhanced for loop, etc.
- Various Java 8 features like Optional Keywords, Lambda expression, Functional interface, Stream API, Method reference operator, etc.
- Advanced Java concepts like Apache maven, JDBC & Hibernate, Spring Boot, and Sprig Boot Microservice.
- Java Test Case writing for unit testing and Integration testing using Junit 5 and Mockito.

As UI Developer:

- Basic Front-End scripting language Like HTML, XML, etc.
 - Basic Front-End scripting language Like HTML, XML, etc.
 - Extensively worked on CSS Background, CSS positioning, CSS Text, CSS Border, CSS margin, CSS Text, CSS padding, CSS table, Pseudo Elements & and classes, and CSS behaviors in CSS.
 - Experience in making responsive web pages using Media Query and Bootstrap.
 - Proficiency in Angular is the core skill for an Angular developer. This includes knowledge of Angular 2+ and the ability to build complex web applications using Angular's components, services, and modules.
 - Angular is primarily written in TypeScript, so a strong understanding of TypeScript, including its features, typing system, and advanced language concepts, is crucial.
 - Familiarity with the Angular Command Line Interface (CLI) for generating code,
 - Understanding of Reactive Extensions for JavaScript (RxJS) for handling asynchronous operations, observables, and reactive programming in Angular.
 - Ability to make HTTP requests and consume RESTful APIs to retrieve and manipulate data in Angular applications.
 - Proficiency in configuring and managing routing in Angular applications to create single-page applications (SPAs).
 - Knowledge of testing frameworks like Jasmine and Karma to write and run unit tests for Angular components, services, and directives.
 - Skill in using browser developer tools and Angular-specific debugging tools for troubleshooting and debugging Angular applications.
-

Personal Details:

Name: Arhit Chatterjee

Father's Name: Mr. Anit Chatterjee

Emergency Contact: +91 9742675644

DOB: 26-APR-1999

Hobbies: Cricket, Football,

Birth Place: West Bengal, India

Nationality: Indian

Declaration:

I hereby declare that the above-mentioned details furnished by me are true to the best of my knowledge. I assure you that given an opportunity, I will execute my work to the fullest satisfaction of the organization.
