➤ PERSONAL SUMMARY:

I am an ambitious and dedicated problem solver with a profound passion for the dynamic realm of online businesses. Eager to align myself with a team of like-minded developers, I bring a wealth of experience in crafting logical and inventive solutions to intricate challenges. My work is characterized by a meticulous and precise approach, underscored by an unwavering enthusiasm for technology, mobile applications, and optimizing user experiences.

Embracing personal development as a cornerstone of my journey, I consistently assess and enhance my skill set, ensuring that I remain at the forefront of web development trends. My knack for resolving issues comes naturally, underscored by a track record of accomplishments in delivering successful projects across diverse domains including IT consultancies, software houses, web design agencies, and IT departments.

Presently, I am actively seeking a position within a company that values and rewards exceptional performance. I aspire to contribute my expertise to a range of high-profile projects, while continuing to evolve in a collaborative and innovative professional environment.

➤ AREA OF EXPERTISE:

Web application development | Bug fixing | Troubleshooting | Identifying technical solutions | Client Handling | Project management | Team player

➤ TECHNICAL SKILLS:

PHP | Laravel | JavaScript | jQuery | MySQL | MongoDB | Angular | React | React Native

➤ CAREER HISTORY:

Zapoj India Private Limited

Location: Gannavaram, Andhra Pradesh, India

Designation: Senior Full Stack Web Developer

Period of Work: March 2018 – Present

Key Contributions and Responsibilities:

- Spearheaded the end-to-end backend development of the Messaging Communication Portal using Laravel. Designed and implemented scalable data models and authentication mechanisms, ensuring secure and efficient data handling.
- Utilized Eloquent ORM to optimize database interactions, resulting in streamlined and high-performance data querying.
- Designed and developed RESTful APIs that seamlessly connected the Angular frontend and mobile applications. Implemented secure authentication and authorization mechanisms within the APIs, ensuring data integrity and user privacy.

SENIOR FULL STACK DEVELOPER

- Led the development of a dynamic and user-centric web application using Angular. Created reusable components and integrated advanced frontend functionalities such as real-time messaging and notifications, enhancing user engagement.
- Successfully implemented a microservice-based architecture, modularizing components for improved scalability and maintainability. Collaborated with teams to define API contracts and establish seamless communication between microservices.
- Managed both MySQL and MongoDB databases, optimizing queries and indexes for efficient data retrieval and storage.
- Designed and maintained adaptable database schemas to accommodate evolving application requirements, ensuring flexibility and data integrity.

Envertis Software Solutions

Location: Kolkata, West Bengal, India

Designation: PHP Developer

Period of Work: September 2017 – March 2018

Key Contributions and Responsibilities:

- Played a pivotal role in the ongoing maintenance of the Event Management System. Ensured the system's smooth functioning by promptly addressing issues, optimizing performance, and implementing necessary updates.
- Leveraged my in-depth understanding of the PHP Rex Framework to make targeted modifications and improvements to the Event Management System. This included refining existing features, optimizing code for better performance, and enhancing user experience.
- Tackled complex challenges and technical issues head-on, employing analytical thinking and innovative problem-solving skills to identify root causes and implement effective solutions.
- Demonstrated a strong commitment to meeting project timelines and milestones. My efforts contributed to the timely delivery of system updates and enhancements, ensuring client satisfaction.

Nosyworld Technologies LLP

Location: Kolkata, West Bengal, India

Designation: PHP Developer

Period of Work: March 2014 – September 2017

Key Contributions and Responsibilities:

- Leveraged my strong grasp of PHP frameworks, including CodeIgniter and Laravel, to develop dynamic and feature-rich websites. This included implementing intricate business logic, data processing, and interactive user interfaces.
- Successfully built websites utilizing PHP-based content management systems (CMS), with a specialization in WordPress. This involved creating visually appealing and user-friendly websites while ensuring optimal performance and security.
- Demonstrated a commitment to producing top-tier work by diligently testing and validating every aspect of the development process. This approach resulted in the delivery of robust and error-free applications to clients.
- Undertook the complete back-end development and maintenance of websites, utilizing PHP and MySQL. Managed databases, optimized queries, and ensured smooth data flow to support seamless user experiences.

- Actively engaged in discussions with clients to thoroughly understand their requirements and expectations. Collaborated effectively to clarify project goals, scope, and design specifications, ensuring alignment with client needs.
- Approached challenges with a problem-solving mindset, identifying solutions that balanced technical feasibility with client objectives. This approach contributed to the successful resolution of complex issues.
- Collaborated seamlessly with multidisciplinary teams, including designers and front-end developers, to integrate designs, functionalities, and user interfaces. This collaboration resulted in cohesive and visually appealing end products.

➤ ACADEMIC QUALIFICATIONS

- B.Sc. In Information Technology from Punjab Technical University at 2014 (Distance Mode)
- Secondary Examination from W.B.C.H.S.E. at 2010.
- Madhyamik from W.B.B.S at 2008

➤ RECENT PROJECTS:

Project: Zapoj Communication

Project Description: Centralized Communication System for Corporate World

Technical Environment: PHP, Laravel (Microservice Architecture), MySQL, MongoDB, Angular (9, 10, 11, 12), DocuSign

Live URL: <https://zapo.com>

In my role as a key contributor to the Zapoj Communication project, I played an integral part in the development and implementation of a cutting-edge Centralized Communication System designed for the corporate realm. This project was not only notable for its innovative features but also for its advanced architectural approach, employing a Microservice Architecture and involving complex multi-database connections.

Responsibilities:

- Orchestrated the development within a Microservice Architecture, a design paradigm that entailed breaking down monolithic components into modular, independently deployable microservices. This architectural strategy led to improved scalability, fault isolation, and rapid feature development.
- Utilized PHP and Laravel to spearhead the backend development of the microservices. Expertly managed multiple database connections, optimizing queries and ensuring efficient data retrieval and storage across MySQL and MongoDB databases.
- Led the development efforts for both the back-end and front-end components. On the back-end, utilized PHP and Laravel to architect and create a robust infrastructure for seamless data management and processing. On the front-end, harnessed the power of Angular (9, 10, 11, 12) to craft dynamic and user-friendly interfaces.
- Designed, developed, and meticulously tested RESTful APIs, crucial for seamless communication between the Laravel microservices and the Angular frontend. Ensured that real-time data synchronization and interactions were effectively facilitated.
- Successfully integrated DocuSign functionality into the platform, enhancing document management capabilities and digital transaction processes within the system.

Project: Restaurant Menu Profit Management

Technical Environment: PHP, Laravel, MySQL, Bootstrap 4, Stripe API, WordPress

Live URL: <https://menuprofitsolution.com>

In the capacity of a Full Stack Developer, I played a pivotal role in conceiving, developing, and deploying the Restaurant Menu Profit Management project. This innovative solution addressed critical aspects of profit management within the restaurant industry. My comprehensive responsibilities encompassed both front-end and back-end development, as well as debugging, testing, and successful deployment.

Responsibilities:

- Spearheaded both the front-end and back-end development of the application, enabling a cohesive and integrated user experience.
- Leveraged technologies such as Bootstrap 4 to craft a visually appealing and responsive front-end interface. Ensured optimal user interactions and seamless navigation.
- Utilized PHP and Laravel to architect a robust and scalable back-end infrastructure. Implemented data models, business logic, and secure authentication mechanisms.
- Successfully deployed the application on Digital Ocean, ensuring its accessibility and availability to users.
- Seamlessly integrated the Stripe API for secure and streamlined payment processing, enhancing the user experience.
- Integrated WordPress to provide an informative and engaging web presence, complementing the core application.
- Diligently debugged code and conducted thorough testing to identify and rectify issues, ensuring a high-quality and error-free application.

Project: Portfolio Site for Hospital and Hospital Booking Management Service

Technical Environment: PHP, Laravel, MySQL, Bootstrap 4, Angular

Live URL: <https://www.irishealthservices.com>

Responsibilities:

In the capacity of a Full Stack Developer, I played a pivotal role in conceiving, developing, and deploying This Website. My comprehensive responsibilities encompassed both front-end and back-end development, as well as debugging, testing, and successful deployment. Diligently debugged code and conducted thorough testing to identify and rectify issues, ensuring a high-quality and error-free application.

➤ **DECLARATION:**

I hereby solemnly declare that all the statements made above are true and correct to the best of my knowledge and belief.
