Professional Summary:

Experienced professional with a strong background in analyzing, troubleshooting, and problem facilitation. Exceptional ability to work under tight deadlines and maintain high performance during critical production activities. Effective communication skills for knowledge transfer and collaborative teamwork. Committed to delivering quality work and adhering to organizational ethics.

Experience Summary:

- Currently working as an SME for 31+ financial tier 1 applications, actively participating in merger activities since March 2022.
- Proactively monitored applications, servers, URLs, job flow, and databases using relevant monitoring tools.
- Analyzed and resolved issues, proposed workarounds to ensure business continuity and minimize downtime. Identified critical issues and took prompt and effective actions for closure.
- Collaborated with development teams, internal teams (IEs, DBAs, Command Center, Scheduling, IAM, LINUX/UNIX, and monitoring) to address issues and deliver timely solutions.
- Maintained vigilance over job flow, identifying job errors, and facilitating job recovery when necessary.
- Coordinated between Line of Business, development teams, and end-users to ensure timely delivery of effective solutions.

Work Experience: Infosys Private Limited

PROJECT:

Client : Truist

Role 1 : Production Support Engineer (oct 2019 – 2022)

Highlights:

- Provided Level 2 application support for Commercial lending portfolio in a top 10 U.S. bank.
- Expertise in request, incident, and change management processes.
- Actively engaged in Disaster Recovery events, P1/P2 calls, ACH migration, Firewall Changes, and Firmware upgrades, delivering end-to-end validation results to LOBs and stakeholders.
- Generated monthly metrics reports, weekly reports, and daily health check reports with 100% accuracy. Calculated average mean time to resolve incidents and service requests assigned to the team each month.
- Worked closely with application vendors, handling file reception, source code changes, and SQL queries for database updates/deletions, loan deal management, and loan field modifications.
- Participated in application validation processes, patching activities, change implementation, and network-related issues.

Role 2: DevOps Engineer

January 2022 – Present

- 1 year experience in source code management. Good Experience with GIT/GITHUB version control system
- Good understanding of the principles and best practices of Software development life cycle (SDLC) in Agile and Waterfall methodologies.
- Developed Jenkins Declarative pipelines using script to trigger on GITHUB pull requests for application build and deploy using tools like maven, docker and ansible.
- Automated most of the complex task's through Ansible.
- Implemented continuous integration and delivery for build and deployment using Jenkins.
- Experience with DOCKER tool, running the containers, pulling images from the Docker Hub, creating Docker files to manage containers which are customized, docker commits to capturing the file changes into new Image and pushing the image into docker hub.
