Professional Summary

Experienced Quality Assurance Engineer with a background in writing manual test cases and automated test scripts. Collaborates closely with developers to identify and address issues before software releases. Proficient in reviewing backend changes including SQL queries, stored procedures, and triggers. Possesses strong teamwork skills and excels in cross-team collaboration.

Experience

- Developed comprehensive test plans using advanced testing technologies.
- Identified software bugs, documented findings, and proposed resolutions to development team.
- Executed automated test suites, evaluating performance, functionality, and scalability.
- Optimized test cases to enhance success in manual software testing.
- Created effective test scripts for automated feature testing.
- Collaborated with various departments to devise innovative solutions for functionality issues.
- Worked closely with developers and project managers to assess program capabilities and testing requirements.
- Suggested improvements in development and testing processes to enhance usability, functionality, and performance.
- Maintained communication with product owners to stay updated on intended functionality.
- Initiated corrective actions for project closure and recurrence control.
- Documented integration issues, vulnerabilities, and provided recommendations for improvements.
