EXPERIENCE

INTEL | FULL Stack Developer Intern

July 2022 - June 2023

- We developed a Full-stack application for the Data Center and AI group in a team of 8 members.
- It is a Web portal developed using front-end technologies like HTML, CSS, Bootstrap, jinja template, and vanilla javascript and backend technologies like Python Flask, SQLAlchemy, and Postgresql.
- The Portal represents a cross-intel initiative to drive systematic market-important workload orientation into Intel's product planning, development, and delivery.
- Influenced 250 enterprise data innovators and doubled Intel's consumption revenue to \$60M.

PROJECTS

1. Intel Full stack developer work Demo Project

2. Major Project/Research Work(MTech)

- Developed Web-based application on **Wireless telemedicine and healthcare via WBAN** (Wireless Body Area Networks)
- ML algorithm **decision tree classifier** was used for predicting emergency conditions.

3. Major Project(BTech)

- Developed Web Based application - **Gym Management system**
- Used **HTML, CSS, vanilla JS** in the front end, and **Flask framework** in the backend

ACHIEVEMENTS AND AWARDS

- **2x GATE Qualifier**
 - GATE 2020
 - GATE 2021
- **DRDO 2023 JRF Waitlisted**
- **CodeChef: 2* (1551)(Highest)**
- **CodeForces : (883)(Highest)**
