PROFILE SUMMARY

Detail-oriented Data Engineer with 1.2 Years of Experience. Designs, develops and maintains highly scalable, secure and reliable data structures. Proficient at developing database architectural strategies at the modeling, design and implementation stages.

WORK EXPERIENCE

February 2022 - March 2023

Data Engineering Associate at **ACCENTURE**, Bangalore

PROJECT: Ally Financial

ATTAINMENTS:

- Strong programming skills with proficiency in Python and PySpark.
- Proficiency in SQL, SNOWFLAKE and experience in data modeling, data wrangling and experience in working with relational databases for data storage and retrieval.
- Experience across multiple Big data technologies such as Hadoop, MapReduce, HDFS, Hive, Sqoop.
- Hands-on experience on YAML code.
- Managed lifecycle elements of ETL development, from robust testing to final deployment.
- Designed compliance frameworks for multi-site data warehousing efforts to verify conformity with state and federal data security guidelines.
- Collaborated on ETL (Extract, Transform, Load) tasks, maintaining data integrity and verifying pipeline stability.
- Experience in building CI/CD pipelines and associated processes for automated builds using AWS, Git, Bitbucket.
- Designed and implemented effective database solutions and models to store and retrieve data.

EDUCATION

July 2021

Bachelor of Technology (B. Tech)

Electrical and Electronics Engineering

Sri Venkateswara College of Engineering, Tirupati, AP

CERTIFICATIONS

- Python Certification from UpGrad. [Click Here](#)
- SQL and Relational Databases Certification from IBM. [Click Here](#)
