## Career Objective

To secure a position in a reputed organization where I can face real world challenges and thereby showcase my skills for the betterment of an organization as well as the society.

## Technical Skills

### Amazon Web Services

- Compute service : Amazon EC2, Auto Scaling, Load Balancing.
- Networking : Amazon VPC, Route 53 (DNS).
- Storage Services : Amazon S3.
- Security and Identity : IAM.
- Deployment and Management : AWS CLI, Amazon Machine Images (AMIs).
- Serverless Computing : AWS Lambda.
- Additional tools : Elastic Kubernetes Service, Lightsail, Amazon Transcribe, Cloud Watch, Cloud Trail.

### DevOps Tools

- Containerization and Orchestration : Docker and Kubernetes.
- CI/CD : Jenkins.
- Version Control : GitHub.
- Build and Dependency Management : Maven.
- Artifact Repository : Nexus.
- Web Server : Apache Tomcat.
- Configuration Tool : Ansible.

### Basics of Linux

## Academics

| Program                           | University/Board                                   | Year of completion | Percentage |
|-----------------------------------|----------------------------------------------------|--------------------|------------|
| Master of Business Administration | University of Mysore<br>( Information Technology ) | 2021 - 2023        |            |
| Bachelor of Computer Application  | Davengere University                               | 2016 – 2019        | 73.66%     |
| Pre-University                    | St. Joseph Pre-University College                  | 2014 – 2016        | 55.33%     |
| 10th                              | Don Bosco School                                   | 2014               | 73.44%     |

## Projects

- Built a basic web application with Maven, seamlessly integrated Maven with Nexus for artifact management, and successfully deployed the application on Apache Tomcat server hosted on an EC2 instance running Linux.
- Hands on with Git and its commands for version control and collaborative development.
- Hands on in containerization with Docker, demonstrated by successfully Dockerizing applications, including a simple web server(Nginx) and microservices creating Docker images, building, running, and managing containers, ensuring efficient deployment and scalability.
- Deploying and managing Kubernetes clusters on AWS EKS, including AWS VPC setup.
- Continuous Integration (CI) and Continuous Deployment (CD): hands-on experience with Jenkins, includes the establishment of Jenkins pipelines automated build processes.
- Hands on in hosting static websites using Amazon S3 bucket, demonstrating expertise in configuring and maintaining reliable web hosting solutions and customized IAM policies to secure and manage access to AWS resources, enhancing security and compliance standards.
- Hands-on experience in developing and deploying serverless functions using AWS Lambda.

## Experience

### Times Group (Metropolitan Media Company)

Worked as a freelancer at the Times Group on some corporate social responsibility events and marketing initiatives.

## Personal Details

Date of Birth : 27/02/1998

Language Proficiency : Kannada, English, Telugu

Marital status : Single

Hobbies : Classical dancer, Poetess, Voiceover.
