

OBJECTIVE

To obtain a full-time position with an organization in the field of Networking to utilize my experience, skills, knowledge and build my expertise as an Inter-Networking specialist, working on a real-time Telecommunications network.

EDUCATION

- **Master of Computer Application, Computer Science (MCA)**
DR. B.C Roy Engineering College, Durgapur, West Bengal (Makaut University)

GPA: **7.31/10**
Graduation: **Aug 2013**

CERTIFICATIONS

- Cisco Certified Network Associate – Routing and Switching (**CCNA - R&S**)
- Cisco Certified Network Associate – Security (**CCNA - SECURITY**)
- Cisco Certified Meraki Associate (**CMNA**)
- Fortinet Network Security Expert (NSE) – **NSE1, NSE2, NSE3**
- Udemy **MPLS L3 VPNs**, “Programming for Everybody - Python”

TECHNICAL EXPERTISE

- **Network Protocols:** IPv4, IPv6, DNS, SIP, TCP, UDP, LDAP, HTTP, STP, VTP, RSTP, ERPS, MSTP, SNMP, NTP, DHCP, PPPoE, Telnet, PuTTY, ICMP, PIM, IGMP, DSL, T1, GR303, HPOTS, ARP, RARP, Ethernet, ATM, Frame Relay, GRE, HSRP, SSH, Diameter, RADIUS, RTP, FTP, RSVP, LDP
- **Routing Protocols:** RIPv1, RIPv2, EIGRP, BGP, OSPF, IS-IS, EGP, CAPWAP
- **Networking Concepts:** MPLS, VPLS, Metro-Ethernet, SDN, IPsec, IDS/IPS, IP Subnetting, NAT, Multicast, MAC addressing, CoS, QoS, Load Balancing, OSI model, TCP/IP Suite, VLAN, DDoS, 802.1Q, VPN, GRE, DSL, POTS, Virtualization, LAN, WAN, ACLs, Firewalls, Cloud Computing
- **Networking Devices:** Cisco 2801, 2811, 2821, 2851, 9300, 9500, ALU 7750, Ciena 5140, Fujitsu 9500
- **Tools:** Cisco Packet Tracer, GNS3, Wireshark, MiniNet, TEMS, WFMT, Tabview, RSVP, CMS, TIRKS, DIV, Remedy, OmniVue, Microsoft Visio
- **Programming Languages and OS:** Python, Linux Operating System, Microsoft Office Suite
- **Network Devices:** Cisco switches & routers, Juniper switches & routers, Fortinet switches, FortiWLC, FortiAPs, FortiGate

RELEVANT COURSEWORK

Into to Telecommunications, Network Protocols, Network Design, Switching & Routing, Wireless Communications, MPLS, SDN, Internet Telephony

WORK EXPERIENCE

“Technical Services Professional”, III Kyndryl Solution Pvt Ltd (An IBM Company) Noida U.P

02 Nov 2021 – 13 Aug 2022

- Replicate issues, run test cases in a lab environment, fix issues which are escalated, file bugs, and provide best practices for large deployments. This includes reviewing and recommending new products/configurations, network design, maintenance and replacement of products.
- Support large network deployments and perform network troubleshooting in following areas: Wireless APs and Controllers, Network analytics, Firewall, Network security, and Switching.
- Utilize packet level knowledge of the Internet to ensure customer network is secure and well-configured.
- Troubleshoot IPsec VPN tunnels between FortiGates and ensure network traffic can traverse VPN tunnel. If not, run debugs and take corrective action so that the user does not face any traffic outage.
- Check configuration of Fortinet devices including network interfaces, IP addressing, static routes and routing protocol configurations.
- Utilize logs and analysis to ensure optimal performance for Fortinet Products with high value in the market.
- Recommend changes in configuration based on analysis of debug output and packet trace – Routing (missing a route), IPv4 Policies (allowing required IPv4 addresses, ports and services), or any other misconfiguration which is hindering normal working of the unit.
- Provide engineering and development support to the entire Fortinet product line: **FortiGate, FortiSwitch, FortiAP, FortiController** .

“Consultant Engineer” II, Trimax IT Infrastructure Pvt Ltd Mumbai

03 Apr 2017 – 01 Oct 2020

- Provide Network Engineering support to Sales team and presales/lifecycle support. Knowledgeable in the field of MPLS IP-VPN, VoIP/SIP Trunking, IPsec VPN tunnels, TDM & Ethernet circuits, IP Routing & Switching protocols.
- Work with MPLS, Managed Network Services, Wireless WAN, SIP Trunking, IP defender, and secured internet access solutions
- Responsible to design any new sites to be added to the existing customer network and to propose CPEs based on customer network.
- Solid understanding on latest Cisco switches and routers and its features and have a good understanding on protocols from layer 1 to layer 4.
- Create customer designs to support multiple redundancy network solution involving MPLS, VPN protocols.
- Responsible to work with the internal team to ensure all the technical details are in place for a successful site turn-up.
- Work on installing Cisco Core switch and host router configurations for customers and monitor and provide network utilization reports.
- As a member of the Professional Services team, collaborate on the evaluation of network diagrams encompassing Layers 1-3 details. Validate configuration parameters, adhere to standard configuration requirements, and assess various network inputs necessary for deploying POTs, Data, and Video services.
- Utilize the validated network inputs to provision necessary POTs, Data, and Video services .
- Provision core network components including Cisco 2821, Cisco 2851, ALU 7750, Ciena 5140, Redback and Fujitsu 9500.
- Manage test and turn up technicians in the field to deploy the new equipment, identify and correct the provisioning delays for CenturyLink projects like CAF2, SLV, Vectoring and Voice troubleshooting. Hands on experience on voice technologies like GR303 and HPOTS.
- Work as an ONA Lead Engineer for the Vectoring project, Voice troubleshooting project, and MOPs submission

- Work with senior engineers to design and support wireline/wireless networks for customers and work with the Sales team closely.
- Work with Implementation Project Managers to ensure the IPM has all the technical details needed to complete the implementation of the customer's network. Generate network usage and utilization reports on an Ad Hoc basis as requested by the customer.
- Add new sites and implement bandwidth upgrades in the company design tool "**Netformx**" for customer networks.
- Implement MPLS, Managed Network Services and SIP trunking related architectures on the company tool Netformx.
- "**Cramer-Network Sync Project**" for automation.
- Hands on experience on Cisco, Juniper, TEJAS, MARCONI, ECI devices and their NMS.
- Worked on the SDH technology in the NOC. Configure, manage and troubleshoot network systems and equipment.
- Replicate issues and test new configuration in Lab. Maintain technical and procedural documents. (IP addresses, Network Visio diagrams)

ACADEMIC PROJECT AND TECHNICAL PAPER PRESENTATIONS

SDN in Wireless, 802.11 ac & ad, Heterogeneous Networks, Voice Recognition and Voice Guidance based GPS turn-by-turn Navigator

Reason for Career Break:

Pursuing Global Certifications CCNP & CCIE
