SUMMARY

Experienced in end-to-end Functional & Automation testing in the Logistics domain for over 1+ year using Agile methodologies. Demonstrated proficiency in streamlining testing processes, enhancing automation scripts, and expediting defect resolution times. Proficient in Selenium WebDriver, TestNG, Java, and Jenkins for efficient software testing and deployment.

EXPERIENCE

Technical Consultant (Automation Testing)

Blue Yonder

02/2022 - 05/2023 Bengaluru, India

Project: Transportation Management System
Domain: Logistic

- Leveraged **Selenium WebDriver** and the **TestNG** framework to develop and maintain automation scripts for 5+ product releases.
- Effectively handled end-to-end processes, including Transportation Requirement Study, Test Plan formulation, Test Case Designing, Test Execution, and the preparation of comprehensive test results, resulting in a 20% reduction in testing cycle time.
- Raised **JIRA** tickets for defects with detailed bug descriptions and achieved an average defect resolution time of 2 days through effective collaboration with the development team.
- Implemented the **Page Object Model (POM)** design pattern resulting in a 40% improvement in test script maintenance efficiency and a 50% reduction in regression testing time.
- Introduced **Jenkins** automation, reducing deployment time by 25% and improving software release efficiency by 15%.
- Experienced in **SDLC** processes like design, effort estimations, bug triage, cross-team communication, KT and brainstorming sessions.
- Identified high-risk areas within projects and prioritized testing efforts, resulting in efficient issue detection and mitigation.
- Proficiently configured and managed test environments, ensuring accurate emulation of production conditions for comprehensive testing.

Customer Support Representative

Mphasis

12/2019 - 12/2020 Mangalore, India

- Efficiently processed insurance documents on behalf of a mortgage company, achieving a 98% accuracy rate and consistently meeting or exceeding service level agreements (SLAs).
- Provided technical support for clients on a wide range of company products resolving issues at a 90% rate.
- Met and consistently maintained company quotas with a 97% call average for excellent customer service.

Operation Executive Trainee

Infosys

07/2019 - 10/2019 Mysore, India

- Daily hands-on exercise on Python problems.
- Trained in best practices to be followed during software development.
- Trained in Programming Fundamentals, Object- Oriented Programming, Linux Server Administration, and Windows Server Administration.

SKILLS

Java	Python	Selenium	Jenkins
TestNG	JIRA	Agile	
Manual Testing	API Testing		
Postman	STLC	Manual Testing	
Test Automation			

PROJECTS

Transportation Management Systems

02/2022 - 05/2023 Bengaluru

- Pioneered a Python script tool using the Password API to analyze password breaches, resulting in a 30% reduction in security incidents.
- Enhanced cross-functional collaboration, reducing testing cycle time by 20% and boosting product delivery efficiency.
- Played a key role in the creation of comprehensive Automation Frameworks, handling System Testing, User Acceptance Testing, Regression Testing, Quality Reviews, Functional Testing, and performance testing.
- Contributed to the enhancement of quality assurance processes, implementing robust QA practices that led to a 25% reduction in software defects.

EDUCATION

Master of Computer Application

St Aloysius Institute of Management & Information Technology (AIMIT)

11/2020 - 06/2022 Mangalore, India

CGPA

7 / 10
