PROJECTS

Title: REUSE AND REFERENCE BOOK MANAGEMENT SYSTEM

July2021-August2021

Technologies : HTML5,CSS3, PHP, SQL, Visual Studio and XAMPP.

The website help students by sharing of materials to students in need. Many textbooks and hard copies are being wasted after semester end exams. In order to use those materials this web application is designed. Website maintains all data inserted by seller. Students come across various materials in website so they can choose their best material. The process will be effective inside the college because there will be no delivery system is required. The buyer can meet seller by seeing delivery information along with book details. Buyer can review and buy it.

Title : INVENTORY MANAGEMENT SYSTEM MINI APPLICATION

September 2023.

An Inventory Management System (IMS) is a specialized software tool or system that helps businesses keep track of their goods and materials in an organized and efficient manner. It allows companies to monitor their inventory levels, streamline order processing, and make informed decisions about purchasing and stock management. Essentially, an IMS is like a digital assistant that helps businesses ensure they have the right products on hand, at the right time, while minimizing excess inventory and associated costs. It's a valuable tool for businesses of all sizes and industries, helping them run more smoothly and profitably.
