

CURRICULUM VITAE

CHETHAN H

PERSONAL DETAILS

- Contact : +91-7338080977
- E-mail : chethan.burre@gmail.com
- Address : GB #109, 5th Cross, HAL Central Township Quarters, Marathahalli, Bangalore-37

CAREER OBJECTIVE

To work for an organization that provides an opportunity to hone my skills and knowledge for growing along with the organization's objective

PROFILE SUMMARY

- An enthusiastic person with 3 years of experience
- Eager to learn new technologies & skills
- Willing to innovate things to improve the existing technology

EXPERIENCE

TECH MAHINDRA LIMITED

CABIN UPGRADE SERVICES FOR ELECTRICAL HARNESS MODIFICATIONS (9 months)

Software Used:

- Design Software - CATIA(Drafting)
- PLM Software – ENOVIA
- BOM Software – TAKSY
- Database - ZAMIZ

Description:

- Electrical harness modifications such as removal or addition of electrical harness, supports etc are captured before & after modification.
- These are pasted in the drafting workbench & are appropriately labeled.
- Elements such as Primary Structures of the Aircraft like Frames & Stringers, Secondary supporting structures, the electrical harness, the supports like spacers, brackets are labeled.
- Item numbers are assigned to elements that are being added or removed.
- Placard drawings are created based on electrical harnesses and supports.
- Bill Of Materials is created taking all these modifications into account.
- These are uploaded for submission in the ENOVIA PLM software.

X-BOM (3 months)

Extraction of Dimensional & Material Specification Data from Engineering Drawings for Estimation & Costing.

SHRIPAD CONSULTANCY(FOR HINDUSTAN AERONAUTICS LIMITED)

HYDRAULICS DESIGN FOR A FIFTH GENERATION FIGHTER AIRCRAFT(For 9 months)

Software Used:

- Design Software - CATIA
- PLM Software - Team Center

Description:

- Analyzing the Architecture for the current Hydraulic System and recognizing the various elements in the circuit .
- Routing Pipes in CATIA using the Part Design module as per the architecture.
- Rerouting the pipes when there are structural changes or any other feedback from other departments.
- Creating supporting structures such as Brackets, etc.
- Designing Junction Blocks when there are lack of standard fittings.
- Uploading files to ENOVIA, performing checks, promoting/demoting parts.

STRUCTURAL DESIGN OF WING & EMPENNAGE FOR COMBAT AIRCRAFTS(For 15 months)

Software Used:-

- Design Software - CATIA
- PLM Software - ENOVIA

Description:

- Creating Part Level and Assembly Level Drawings of various Aircraft Wing Structures.
- Model Based Dimensioning for Part Level components.
- Design of Ribs, Spars, Skins, etc.
- Creating Material Schedule Sheets for Parts, Sub-Assemblies & Assemblies in ENOVIA.

APPRENTICESHIP

HINDUSTAN AERONAUTICS LIMITED

6 months in Structural Design Of Fuselage:-

PROJECT:-

Design of Structures to accommodate Solid State Flight Data Recorder (SSFDR) in KIRAN MARK II Aircraft.

Software Used:-

Design Software - CATIA (Part Design, Generative Shape Design, Assembly, Drafting)
PLM Software - ENOVIA

6 months in various other departments:-

Manufacturing departments such as Machine Shop, Composite Materials, Quality Check etc

ACADEMICS

- Bachelor Of Mechanical Engineering from MVJ College Of Engineering in the year 2017.
- II PUC from St. Joseph's Indian Composite Pre-University College in the year 2012.
- SSLC from HAL High School in the year 2010.

TECHNICALSKILLS

- CATIA
- SOLID EDGE
- ENOVIA

PROJECT

DEFENSE RESEARCH & DEVELOPMENT ORGANIZATION (DRDO)

- Analysis of the current pod in the aircraft & modification of the current cooling system in terms of packaging the LRUs(Line Replacement Units) & the cooling system itself.
- Calculations of the working envelope of the aircraft based on the Altitude & Mach number.
- Coolant fluid flow analysis based on various parameters like Temperature, Pressure, Velocity etc.

INTERNSHIP

HINDUSTAN AERONAUTICS LIMITED (HAL) under AIRCRAFT RESEARCH & DESIGN CENTRE (ARDC)

Processes involved in the manufacturing of combat aircrafts like Non-Destructive testing of Raw Materials, Machining, Heat Treatment, Design, Analysis, Sheet Metal, CNC, Assembly, Compressors, Fuel System Management, Paints etc.
