PROFILE

Professional Quality Analyst with over 2.5 years of experience in software quality processes. Proficient in both QA automation and manual testing for web, mobile (iOS & Android), and API testing, consistently delivering exceptional software quality.

PROFESSIONAL EXPERIENCE

Test Automation Analyst | Accenture, Bengaluru

08/2021 – Present

- Identify and resolve software errors and defects through automation, consistently exceeding client expectations and achieving a notable 20% increase in overall software reliability.
- Automated manual regression scripts and implemented in-sprint automation, resulting in a 60% reduction in regression testing workload.
- Proficient in managing code repositories on Bitbucket/GitHub for an efficient development workflow.
- Managed the successful integration of testing activities into the CI/CD pipeline, enhancing the efficiency of the development process.
- Designed and executed UI automation tests for web applications using Selenium WebDriver and Cucumber with Java, resulting in a significant 30% reduction in manual testing efforts.
- Proficient in KARATE framework for API testing, with hands-on experience in automation testing. Successfully reduced API testing time by 30% through efficient framework utilization.
- Actively engaged in Agile methodologies, leveraging iterative testing with Jira for enhanced team collaboration and efficient product delivery.
- Created and reviewed test plans, designed test cases, managed test data, and reported defects.
- Performed Accessibility Testing using NVDA and axe DevTools, ensuring compliance with accessibility standards and enhancing the overall user experience.
- Collaborated with cross-functional teams to ensure high-quality deliverables across the entire Software Development Life Cycle (SDLC).
- Automated the test data utility, significantly improving test data preparation for each release.
- Achieved a 100% reduction in test data failures during release and an 80% reduction in resource time, earning client appreciation for enhanced efficiency.

SKILLS AND PROFICIENCIES

Testing Tools	Selenium, Cucumber, Karate, Postman (API Testing), TestNG, Dynatrace
Programming Language	Java, JavaScript
Database	SQL, MongoDB, Mainframe
Version Control	Bitbucket, GitHub
Test Management Tool	Jira, X-ray - Creation and Execution of Test Cases, Defect Management
CI/CD	Jenkins
Languages Known	English, Tamil

ROLES AND RESPONSIBILITIES

- Responsible for requirement gathering from client and delivering the functionality.
- Monitor applications and efficiently troubleshoot issues to ensure a bug-free product is delivered.
- Demonstrate effective communication with clients and collaborative efforts with development teams to resolve issues.
- Contribute to continuous integration and continuous deployment (CI/CD) processes by ensuring software stability and reliability through periodic build verification tests.
- Creating test scenarios and cases, executing them, and managing defects efficiently using Jira.
- Mentored and assisted team members, fostering a collaborative environment and contributing to knowledge sharing within the team.

ACHIEVEMENTS

- Received the Star Team Award for delivering the product on time with high quality.
- Earned client appreciation for Test Data Utility Development.

EDUCATION

V.S.B Engineering College, Karur

2017-2021

Bachelor of Technology - Information Technology

Score - 8.36 CGPA

CERTIFICATES

- Automation Full-Stack Engineer
- Automation Engineer Certified (DevOps)
- Kore.ai Experience Optimization Platform Developers Basic Training (BOT Development)
- Programming in Java – NPTEL
