PROJECTS

Phone Book Project

The phone book in javascript keeps a track record of colleagues. This is a simple lightweight program for personal contact manager in the web version. To run this project, first, you need to have a browser and a code editor of any kind. Then you have to run the index file from the editor or directly from the folder. When the screen loads, you can see the homepage. From there you can manage your expense activities. It's my project URL:-

<https://dyadav3.wixsite.com/velo-certification>

li got the velo certification as a velo developer role on wix.com site.!!

Attendance Monitoring System With Fingerprint and Face Recognition System

"The purpose of developing attendance management system is to computerize the traditional way of taking attendance. Automated Attendance Management System performs the daily activities of attendance marking and analysis with reduced human intervention. The prevalent techniques and methodologies for detecting and recognizing face fail to overcome issues such as scaling, pose, illumination, variations, rotation, and occlusions.!!
