Profile

• Having 2 years of IT industry experience as a DevSecOps engineer in Source Code Management, Configuration, Build, Release, and Deployment Management. • Experience working on CI/CD environments such as Jenkins, Github Actions, Azure DevOps and integrating with other applications. • Experience in working with Azure Boards, Azure Repos, Azure Pipelines in Azure DevOps. • Knowledge in integrating code analysis tools like sonarcloud in azure pipelines. • Experience in creating build, and release pipelines for containerized Applications and deploying them in various environments.

Employment History

DevSecOps Engineer - December 2022 – Present

Atriina Technologies pvt ltd, Mumbai

1. Project - Marico FMCG Company.

- Leveraged Azure DevOps for seamless Continuous Integration and Continuous Deployment (CI/CD) pipelines, enabling faster software delivery.
- Managed deployments on IIS, ensuring smooth integration with the Windows server environment.
- Utilized SonarCloud and CAST for code quality scanning and vulnerability assessments, maintaining high code standards and security.
- Collaborated with cross-functional teams to streamline the build and release processes, reducing manual efforts and increasing efficiency.
- Orchestrated software releases, ensuring smooth deployments and minimizing downtime.
- Worked on optimizing application performance on IIS, enhancing scalability and user experience.

2. Project - 1Finance Company.

- Spearheaded the containerization of Finance-related applications (Angular and DotNet) through Docker, simplifying deployment and maintenance.
- Leveraged Kubernetes for efficient orchestration of Docker containers, enabling seamless scaling and high availability.
- Designed and implemented CI/CD processes on AWS using services such as EC2, VPC, ECR, RDS, S3, IAM, AutoScaling, and EKS.
- Configured and managed Nginx Ingress Load Balancer to optimize web application performance and security.
- Utilized CloudFormation to automate infrastructure provisioning, reducing manual efforts and ensuring consistency.
- Collaborated with teams to integrate CI/CD environments Github Actions with various applications, streamlining the software development lifecycle.

Junior DevOps Engineer – November 2021 – December 2022

StockXbid Technologies, Bengaluru

1. Project – Stockxbid E-commerce.

- Utilized Jenkins for setting up and maintaining efficient CI/CD pipelines, enabling automated builds and deployments.
- Dockerized microservices applications, enhancing portability and facilitating streamlined deployment processes.
- Deployed applications on Apache Tomcat servers, ensuring smooth integration and high availability.
- Orchestrated Docker containers on Kubernetes, providing efficient management and scalability for microservices.
- Collaborated with development teams to optimize the CI/CD process, resulting in faster software delivery.

Skill Highlights

- Azure Repos, Github, Git
- Docker, Docker-Compose
- EKS, Native K8s
- Sonarcloud, cast
- Jenkins, Azure Devops, Github Actions
- AWS, Azure Devops
- Cloudwatch, Prometheus and grafana
- Clouformation, Terraform

Professional Summary

- Worked as a DevOps Engineer for StockXbid technologies. (Nov 2021 - Dec 2022)
- Working as a DevSecOps Engineer for Atriina technologies. (Dec 2022 – Present)

Education

- Course : Bachelor of Technology (CIVIL).
- College : GM INSTITUTE OF TECHNOLOGY.

Languages

- English : Professional
- Kannada : Native
