

DHARSHAN MS

Address-Bangalore, Karnataka · Phone- +91 6362819709

Email – ddharshu711@gmail.com

Current student looking to join the workforce to gain real-world experience. Ability to complete tasks on time in both individual and team settings. Dependable and reliable, ready to learn and grow with your company.

SKILLS

- Proficient in **Java** with solid understanding of **object-oriented** programming principles.
- Good knowledge of **Exceptional handling and Threads**.
- Good knowledge on **Collections**.
- Proficiency in **Linux system administration**.
- Familiarity with configuration management tools such as **Ansible**.
- Knowledge of containerization technologies like **Docker and Kubernetes**
- Familiarity with cloud computing platforms like **AWS**.
- Familiarity with source control systems such as **Git**.
- Knowledge of continuous integration and deployment tools such as **Jenkins**.
- Familiarity with database systems such as **Oracle SQL**.
- Expertise knowledge on build tools and packaging the source code using **Maven**.
- Expertise knowledge on **Junit** testing frame work.

PROFESSIONAL EXPERIENCE

Software Engineer Intern | Test Yantra | Jan 2023 - August 2023

- Implemented CI/CD pipelines, Docker containers, and Kubernetes orchestration for efficient software delivery.
- Gained hands-on experience with AWS and Ansible while developing and maintaining Java applications.
- Collaborated on cross-functional projects, contributing to successful outcomes and enhancing technical proficiency.

PROJECT

PROJECT SUMMARY

Project #1

Project : Deploying a containerized web application
Operating System : Linux.

Description:

- The "Containerized Web Application Deployment" project involved deploying a web application using containerization technology to ensure portability and scalability. The project focused on containerizing the web application, creating Docker images, and deploying them on a cloud platform (AWS) using a container orchestration service (Kubernetes).

PROJECT SUMMARY

Project #2

Project : Multi-VPC Connectivity and Peering.

AMI : Ubuntu Server AMI.

Instance type : t2.micro.

Description:

- The "Multi-VPC Connectivity and Peering" project involved setting up secure communication channels between multiple Amazon Web Services (AWS) Virtual Private Clouds (VPCs) using VPC peering. This project aimed to establish seamless connectivity and facilitate the exchange of data and resources between different VPC environments.

EDUCATION

- 2018-2022: Completed BE at Bangalore Institute of Technology with 7.6 CGPA.
- 2016-2018: Completed P U at Alva's Education Foundation with 85.16%.
- 2016 : Completed 10th at JP English High School with 93.12%.
