Summary

- Over **7.5+** years of extensive experience as a backend web developer.
- Proficient in **PHP, Node.js**, JavaScript, HTML5, CSS3, jQuery, Material UI, Bootstrap, Tailwind
- Strong in SQL, NoSQL (**MySQL, MongoDB**, DynamoDB, MSSQL, Firebase)
- Good Experience in **Laravel, Nest.JS** and **Express.JS**
- Good knowledge of frontend technologies and frameworks like react.js, vue.js, angular.js, bootstrap and tailwind.
- Strong in **REST API**, SOAP, Micro services and multi-tenant architecture
- Experienced in Software Development Life Cycle, Agile Development and tools like **Jira**
- In-depth understanding on Software Development Life Cycle (SDLC) phases which includes requirements gathering through client interaction, design, documentation, development, integration, testing, configuration and production support.
- Good knowledge in clouding computing and cloud services like **AWS, EC2, S3 Bucket**. Experienced in Heroku to deploy web applications.
- Have excellent interpersonal communication skill, critical thinking, and goal orientation.
- Proficient in utilizing version control tools such as **Git**, with a solid track record of effectively managing and coordinating collaborative software development projects.
- Extensive expertise in seamlessly integrating diverse payment gateways, including **Stripe, PayPal**, and Razorpay, to facilitate smooth and secure transaction processing within various digital platforms.

SKILLS

Programming skills: PHP, Node.Js, JavaScript, MongoDB, MySQL, HTML5, CSS3, XML, JSON

Frameworks and Libraries: Laravel, Node.js, express.js, mongoose, sequelize, prisma, axios, jquery, socket.io, passport.io, JWT, rabbitmq, redis, Bootstrap, Tailwind, Material Design

Knowledge: Postmen, OOP, Scrum, Agile, Jira, AWS, Linux based server, some cloud service

Tools: Visual Studio Code, Git, SourceTree, Github Desktop, Workbench, MongoDB Atlas

WORK EXPERIENCE

Sparkle Infotech, Surat, India

August 2016 - December 2018

As a PHP developer

I've worked as a PHP developer, focusing on the development of website backends and APIs using PHP and the Laravel framework. My role involved creating robust and scalable solutions to meet project requirements and enhance overall system efficiency.

- Worked on building a high efficiency Web Application using **PHP, Laravel, MySQL, HTML5, CSS3, JavaScript, jQuery, Composer package manager**
- Worked with **Bootstrap Design** as the front-end framework to build a Web Application which can bind data to the specific views and synchronize data with server.
- Implemented setting up async request from **REST API** using axios, jquery in frontend
- Responsible for checking cross browser compatibility and hence worked on different browsers like Safari, Opera, Firefox, Google Chrome and Internet Explorer.
- Implemented **Search** and **Sort** functionality for the list table with **Ajax** calls and receive the result from back-end server.
- Set the **RESTful API** at the backend to deal with **CRUD** action in data with using **Laravel**. Tested all the **RESTful API** calls by using **Postman** and make sure all API calls are satisfying all conditions.
- Used **Git** as the version control tool, code base hosted on GitHub.
- Worked with Jira, Asana
- I worked on skin hospital appointment system built with Laravel.
- Worked on Freelancer website – Chat implemented with node, socket.io other backend functionality is based on laravel

Sassy Infotech PVT, Surat, India

Jan 2018 – Sep 2018

As a LAMP stack dev

- Worked on building web application for manage medicine in stock, checking medicine status and quantities. Using **Laravel, JavaScript, jQuery, HTML5, BootStrap, CSS3, MongoDB and MySQL**.
- Established pages using **CSS3** to maintain the uniformity of all the screens throughout the application and positioning of screen objects.
- Implemented CSS manipulation, html elements-attributes manipulation and animations by using **jQuery**.
- Used plugin like **DataTables, AutoComplete, Toast, Socket.io**
- Used payment gateway like stripe
- Built Authorization and Information Exchange by using **JSON Web Token**.

Edusity, Canada

Sep 2018 –May 2021

I worked on LAMP and MERN stack application as a senior developer.

- I worked on the development of a **SaaS** web application for a course selling website, implementing a multi-tenant architecture. During this experience, I seamlessly integrated payment gateways like **Stripe, PayPal, and Razorpay** to ensure secure and streamlined transaction processes within the platform.

- First version built using **Laravel, MySQL, HTML, Bootstrap, jQuery.**
- Second version of edusity platform are build using **Node.js, Express, MongoDB and React.js.**

Indigital pvt ltd, Bengaluru, India

June 2021 – Current

I worked on LAMP and MERN stack application as a senior developer.

- Contributed to diverse projects involving cutting-edge technologies, including Node.js, React.js, Vue.js, Next.js, and Nest.js.
- Developed a furniture estimate maker with React.js frontend and Node.js backend.
- Played a pivotal role in the creation of a Property Agreement website, facilitating tasks such as property addition, offer letter creation, and digital signing. Additionally, crafted a REST API to support seamless integration with an Android app.

EDUCATION

Ahmedabad Institute of technology

Bachelor of Engineering in Computer Engineering

Courses relevant: Machine Learning; Algorithm Design; Data Structure; Database Management ; CPU; Data Science, Query Languages, Physics, Mathematics
